**DELL**Technologies

DELL APEX NAVIGATOR

Unlock a new standard of excellence for multicloud management and operations.

A simple, SaaS-based management experience in Dell Premier.

Streamline
multicloud operations at scale in one, unified experience.

Maintain
security and facilitate Zero Trust adoption.

Accelerate
deployment with automated connection and configuration.

Dell APEX Navigator

Reduce
risk with visibility and managed access across clouds.

Optimize
workload placement through purposeful data and application mobility.

SIMPLICITY. AGILITY. CONTROL.

Consolidate workflows across public cloud and on-premises environments.

Enable ITOps teams to modernize operations and drive rapid innovation.

Automate discovery, configuration, and deployment of IT resources.

Flexibility that meets your unique requirements.

Reduce time spent configuring cloud infrastructure by **up to 95%** when deploying with Dell APEX Navigator[1]

Dell APEX Navigator for Multicloud Storage
Available for Dell APEX Block Storage for AWS and Dell APEX File Storage for AWS

Break down siloed experiences with centralized management of Dell storage software across multiple public clouds. This set of capabilities simplifies multicloud storage management, enabling ITOps and storage admins to configure, deploy, and manage Dell storage in public clouds. Additionally, monitor and ensure seamless data mobility across on-premises and public clouds.
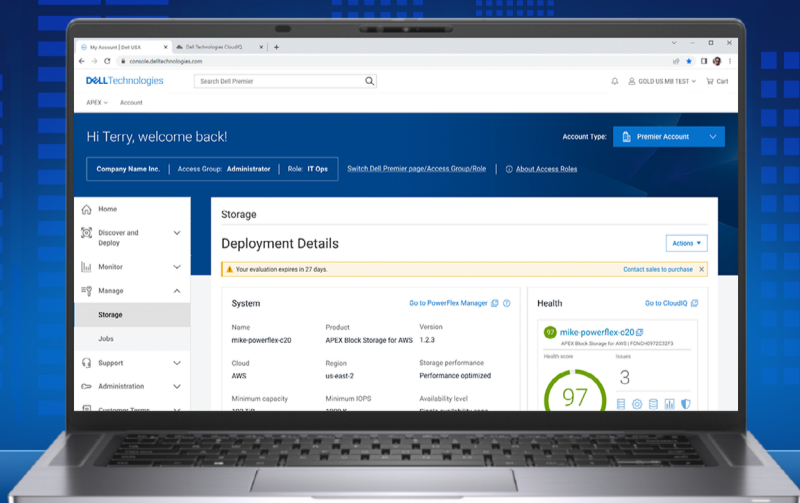

Dell APEX Navigator for Kubernetes
Available for Dell PowerFlex

Streamline Kubernetes persistent storage discovery, deployment, and management across multisite environments. With Dell APEX Navigator for Kubernetes, access to advanced data services is easy. Storage admins and DevOps teams can leverage complete storage services management at scale for their Kubernetes ecosystem.

5 Minutes to onboard a cluster[2]

ELEVATE YOUR MULTICLOUD EXPERIENCE
Start your risk-free 90-day evaluation today.[3]
