

Deploy with greater speed, less effort and more flexibility for an exceptional end-user experience

ProDeploy Client Suite

ProDeploy Client Suite helps you get users up and running quickly using cloud-based solutions for an exceptional end-user experience.

At Dell, we leverage our long-standing expertise in deployment— offering a range of services to simplify the process whether you’re managing a local or hybrid workforce. From planning and set-up to configuration, installation, data management and asset retirement, Dell provides the behind-the-scenes expertise needed to help your end users be productive right out of the box.

Flexible options to cover all your needs

		 ProDeploy Essentials From initial PC setup and preparation to data transfer, whether remote or onsite, ProDeploy Essentials is geared toward limited interruption for the end user.	 ProDeploy We partner with your IT to apply common customization of hardware and software so systems meet IT specifications for security, software and network protocols.	 ProDeploy Plus We take care of end user needs and device preparation while working with IT to plan, configure and deploy using modern solutions.

How to choose the ideal solution for your business

Ask yourself these questions:

Solution Options:

- ✓ Are you currently using cloud services, or interested in transitioning to cloud services?
- ✓ Are you looking for a ready-to-work, out of the box solution?
- ✓ Do you need a comprehensive deployment solution, including device configuration, labeling, imaging, software provisioning, data management and legacy asset retirement?

**ProDeploy
Plus**

- ✓ Do you need help with deploying systems with standard configurations and software loads?
- ✓ Do you need help with BIOS settings, require asset tags, need to know what's in the box, or need to prepare your device management tools before they arrive?

ProDeploy

- ✓ Could your IT staff use some help installing systems but don't use or need help with what ProDeploy or ProDeploy Plus cover?
- ✓ Are you a one-person-band and need help with:
 - ✓ PC installation
 - ✓ Application Installation
 - ✓ Data migration

**ProDeploy
Essentials**
