APEX

Enjoy a worry-free experience for Dell APEX Compute

Achieve a higher level of control for your Dell APEX experience with a customer-managed model designed to empower you with ownership of tasks such as monitoring capacity utilization, infrastructure management, and resource optimization.

Designed for OpEx[1], you can remove the challenges of infrastructure ownership and up-front budgeting with Dell APEX Compute. Dell owns the infrastructure and is responsible for support and asset removal at the end of the subscription.

Subscribe to on-premises bare metal compute resources supporting your choice of operating system or hypervisor for virtualized or container-based environments. Available through a predicable, monthly subscription with simple order configuration through the APEX Console.

Get a trusted advisor and primary point of contact

✓ Delivers a smooth onboarding experience   ✓ Engaged from day 1 throughout your subscription term

Coordinated by Dell Technologies
Customer Success Manager

Deploy	Support	Decommission
