

Greater financial inclusion.  
Smaller carbon footprint.

PhonePe is a fintech company in India that is accelerating the country's digitization efforts by providing greater access to digital payments to drive social progress. These simple, digital payments include everything from utilities to insurance to mutual funds.

### Making a national impact.

Adults in India without a bank account	People in India that use PhonePe
<b>190 million</b>	<b>485+ million</b>
PhonePe transactions a day	Transactions in a month
<b>185+ million</b>	<b>5.5+ billion</b>
Transactions per second	Merchants using PhonePe
<b>7 thousand</b>	<b>36+ million</b>

"Dell has been a true partner and worked with us through the challenges that come with achieving innovation at this scale."

**Burzin Engineer**

CO-FOUNDER & CHIEF RELIABILITY OFFICER, PHONEPE

### Powering PhonePe

- Dell PowerEdge Servers
- Dell PowerSwitch Networking
- Dell PowerVault Storage
- Dell Services

Improved overall power efficiency with expected lowering of power usage effectiveness (PUE) from 1.6 to 1.35.

### Powered by PowerEdge Servers

- Power savings of more than \$3 million per year
- Higher compute density
- Direct Contact Liquid Cooling (DCLC) and Liquid Immersion Cooling (LIC) customizable capability

"If all of us do our part for sustainability, we will all be able to enjoy this place we call Earth for a much longer time."

**Burzin Engineer**

CO-FOUNDER & CHIEF RELIABILITY OFFICER, PHONEPE

### The importance of sustainability.

PhonePe launched its sustainable data center with Dell PowerEdge servers powered by Intel® Xeon® Platinum processors and alternative cooling technologies like DCLC and LIC to help reduce carbon emissions and meet sustainability goals.

Results include expected reduction of 26% for power consumption and 15% for PUE.

See how PhonePe offers financial empowerment.
