

# Delivering high-quality remote education to students in Pennsylvania

Reliable laptops and monitors from Dell Technologies provided a successful at-home school environment for remote learning.

## Business needs

To manage growth and enable online educational excellence at scale, Commonwealth Charter Academy (CCA) needed a technology partner that could guide them to the right solutions. Dell Latitude 3000 Series Laptops and Dell E Series monitors from Dell Technologies offered the best reliability and learning experience to position online students for success.

## Business results

**Reliable, durable** Dell Latitude 3000 Series Laptops ensured remote learning was not interrupted.

**Dell E Series** monitors helped transform at-home spaces into productive educational ecosystems.

**Lightweight** Dell Latitude 9000 Series Laptops supported the teaching staff's mobile, hybrid work environment.

**Laptops and monitors** from Dell Technologies helped CCA make productive and efficient remote learning possible.

Commonwealth Charter Academy

**Reliable laptops and monitors connect remote students to classrooms for productive, engaging school days**

## Reimagining where school happens

As the top online K-12 public cyber school in Pennsylvania with 24,500 students, Commonwealth Charter Academy (CCA) understands the important role technology plays in making remote education successful.

It custom built its own learning management system from the ground up, with personalized education to better serve remote students. In addition, CCA's hands-on, proprietary approach included hosting the application and developing its own course content.

But success brought growing pains and urgent hardware needs for newly enrolled students. To manage growth and stay on top of demand, CCA needed an experienced technology partner that could help it continue providing online educational excellence at scale.

**“We really value the relationship and the partners that Dell Technologies brings to the table. Some of these programs that we’re running, we wouldn’t be running them without Dell.”**

**Bryon Klingel**  
Senior Vice President of Technology  
Commonwealth Charter Academy

## Outfitting remote students for success

When considering how best to equip its large student body, CCA did more than just source devices. It carefully considered which technology would help remote students be productive and comfortable throughout the school day.

First and foremost, the technology could not fail. Like a school bus, laptops transport remote students to school. If they break down, school doesn't happen. Working with Dell Technologies, CCA chose Dell Latitude 3000 Series Laptops for their reliability and durability to ensure students get to school.

But CCA didn't stop there. It wanted to bring course content to life and make remote learning more engaging, so it added Dell monitors to transform at-home spaces into productive and effective learning environments.

**We considered, what is the most productive, most efficient technology for students? Not only do they receive a Dell Latitude 3000 Series Laptop, but they also receive a Dell monitor.”**

**Bryon Klingel**  
Senior Vice President of Technology  
Commonwealth Charter Academy

## Supporting the staff's hybrid work environment

CCA's nearly 2,000 staff members required powerful and easily portable machines suitable for their mobile job functions and hybrid work environments.

To meet these needs, CCA chose the fast Dell Latitude 9000 Series Laptops, which it found outperformed other manufacturers while remaining thin and lightweight and also giving staff the collaboration tools they need to work or teach from anywhere.

**“ We look at reliability and durability for student equipment. We chose the Dell Latitude 3000 Series Laptops, and we’re really happy with their durability.”**

**Bryon Klingel**

Senior Vice President of Technology  
Commonwealth Charter Academy

## Enabling flexible, inclusive remote education

CCA prides itself on having a family-focused, inclusive model that accommodates a broad range of students. Technology from Dell Technologies helps make this flexibility and inclusivity possible.

Whether it’s helping students connect to their personalized learning programs through the CCA application, or offering the hockey team flexible access to course content to get more practice time on the ice, CCA positively impacts thousands of students’ lives every day.

**“ Our staff has landed on the Dell Latitude 9000 series. It’s a light laptop. Our staff tends to be mobile. They’re working in a hybrid environment or at home.”**

**Bryon Klingel**

Senior Vice President of Technology  
Commonwealth Charter Academy
