

Unlock a new standard for multicloud storage management and operations

Dell APEX Navigator for Multicloud Storage

Break down multicloud silos with an integrated Dell APEX Console experience that centralizes management of Dell storage software across multiple public clouds.

Solving multicloud challenges

Key Capabilities →

Dell APEX Navigator for Multicloud Storage keeps you protected with a security approach that incorporates Zero Trust principles, including role-based access control (RBAC), single sign-on (SSO), and federated identity, allowing you to retain full control over roles, permissions, groups, certificates, and keys.

Reduce time spent configuring cloud infrastructure by up to 95% when using Dell APEX Navigator to deploy Dell storage in the public cloud.¹

Centralize day-to-day storage management activities with easy access to familiar Dell storage management tools for a consistent experience across public cloud and on-premises.

Maintain full visibility into system health, license inventory, and capacity with intelligent insights and alerts.

Continuously optimize data placement with centrally orchestrated data mobility, so you can rapidly align with shifting business requirements and cloud strategies.

Public APIs make it possible for you to integrate Dell APEX Navigator into your broader IT automation strategy and IaC (infrastructure-as-code) tools such as Terraform.
