

The Smart System Orchestrator

Smart data | Smart decisions | Smart operations

**OneMindNG is The Smart System Orchestrator  
enables Smart Cities to share information between systems  
to improve government decision-making and optimise their services.**

An end-to-end IoT solution- all city departments can collect and process their data in a central location, allowing them to address issues in a more holistic and coordinated way. Joint management of city operations avoids inefficient project overlaps and enables rapid response to events on the ground.

## Benefits for the City

### Shorter Reaction Time

Interaction with all systems in one view

### Augmented Intelligence

Correlations, predictive and corrective analytics

### Improved Efficiency

Procedures (SOPs) compliance

### Better Coordination between all agencies

Common access to real time and forensic information

### Increased Control

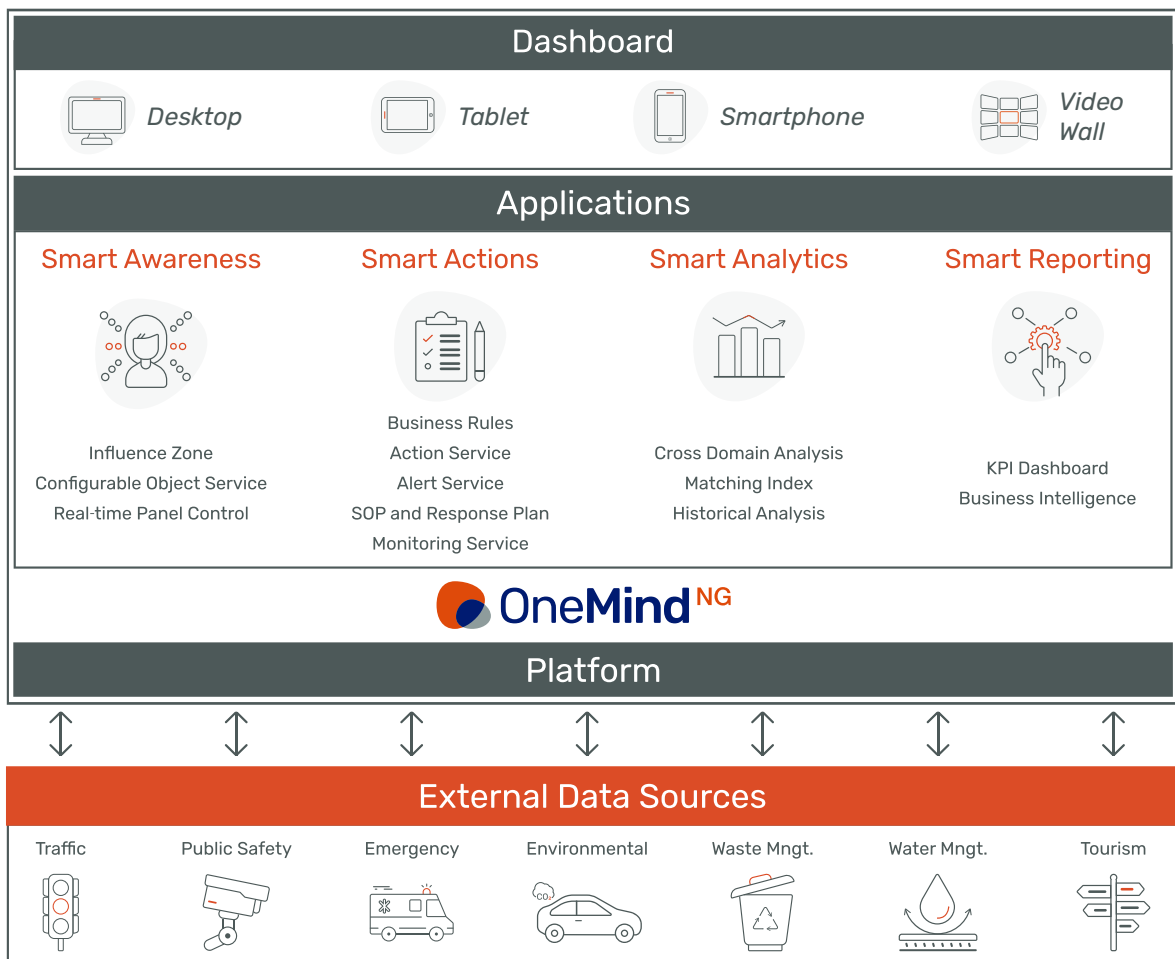

Resources monitoring: position, patrolling, routes

### Future-proof & Agnostic

Able to integrate any technology, following the latest standards

## How does OneMind New Generation work?

The Smart System Orchestrator solution for Smart Cities that allows to integrate any technology in a SMART way

Simple

Multilayer

Agile

Rapid

Time and cost-saving

## State-of-the-art technology

High Availability & Scalability

Modular and Plugins Analytics

Multitenancy Deployment

Multilingual and Multicultural (RTL)

SaaS ready and On-premise supported

Role Based Access Control

Fully Configurable Front end

Bring your own map

Low Code Engine ETL & Automation between all agencies

Historical Mode & Time-based Analysis

Multi-device Front end

Vertical Layer Supported

## Front End

**Hello,  
We are the #OneMindersTeam**

We operate globally based in Barcelona, the innovative technology hub. Our passionate international senior team accumulates a lot of experience and knowledge in developing and implementing Smart City projects and smart technology.

We are always pleased to bring personal added value to our customers and partners.
