

Migrate your storage with peace of mind

- No payments for 6 months**
- 6 months free maintenance

Accelerating Digital Transformation is a key priority for every business today.

We know you want to transform. Upgrade to new storage equipment and take advantage of higher performance, lower costs and smaller footprint associated with new technology.

Cost effective migration

Run two environments in parallel at the cost of one for 6 months, avoiding double maintenance costs

Improve performance

Moving to a scheduled refresh cycle enables the latest security features, increased data center agility and performance

Choose sustainability

Enable a strategy that recycles your new storage in a secure and environmentally conscious manner

Accelerate migration

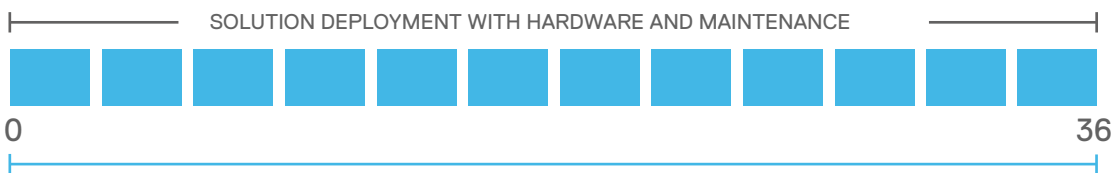

Get the technology you need now with no interruption to business operations during transition

Get the technology you need NOW

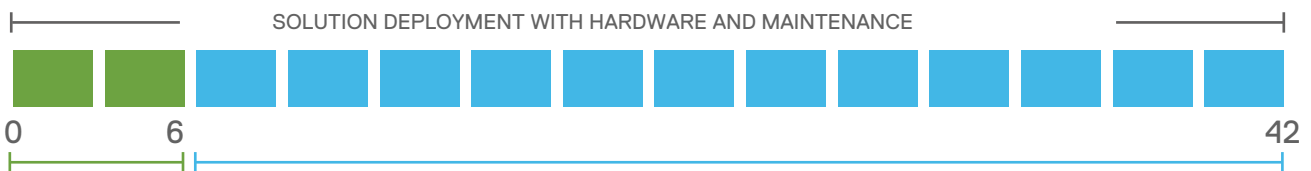

By adding a cost-free 6 months 'bridge' between the migration from old to new environments, you avoid the double maintenance costs normally associated with running both environments in parallel during the migration phase – so a 36 month lease becomes 42 months for the cost of 36.

This enables you to take advantage of the technology you need, with maintenance covered at no additional costs for the first 6 months. This program is also available over four or five-year terms and includes the flexibility to add upgrades at any time.

Standard Technology Rotation**

006 Program**

There is no technology changing faster than storage. The data needs of an organization is all-encompassing and EVERYTHING relies on accessing and protecting it. Data backup, disaster recovery, cloud management, storage size; all are evolving at a dizzying pace.

This program is designed to help organizations succeed by providing a cost-effective way to migrate and enable digital transformation.
