

Rapidly evolving workloads are increasing the need for flexibility and simplicity, led by an unmanageable rate of change

AI mandates

Workload disruption

Skill gaps

Operational complexity

Cost efficiency

Siloed resources

88% of C-level executives expect to experience more change in 2025 than they did in 2024<sup>1</sup>

But what if you could stay ahead?

Adopt new technologies sooner

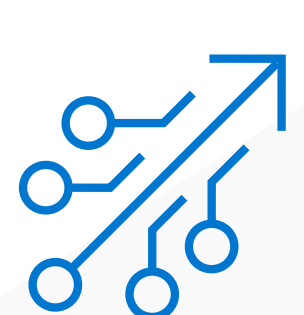

Adapt your strategy faster

Boost operational confidence

Evolve easily at scale

# Dell Automation Platform

We automate so you can innovate

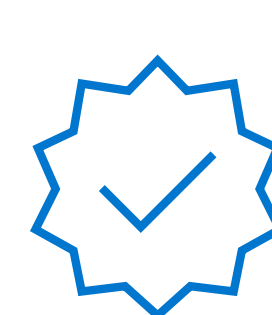

## Velocity

Automated provisioning on disaggregated infrastructure to adopt new technology, faster

## Simplicity

Centralized management and operations experience that makes evolving at scale easy

## Assurance

Validation and support delivered by Dell's experts, with Zero Trust built-in to operate with confidence

**Zero touch onboarding** with built-in zero trust principles, ensuring consistent protection from factory to facility.

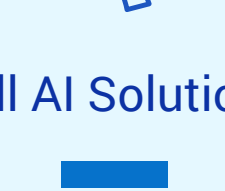

Dell's approach to disaggregated infrastructure delivers a **unified, appliance-like experience** that safeguards hardware investments while offering **flexibility and choice**.

Efficiently allocate resources with **independent scaling** and easily re-purpose infrastructure with new software to seamlessly match your workload requirements.

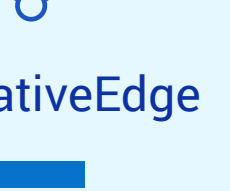

Built for your requirements

Dell Private Cloud

Dell AI Solutions

Dell NativeEdge

**Reliable, automated provisioning** for Dell Private Cloud, Dell AI Solutions and Dell NativeEdge using comprehensive blueprints tested and validated by Dell's experts.

Lifecycle management

**Simplify operations** with centralized storage management, intelligent observability and integrated support processes.

Continuously validated
