Dell PowerProtect Backup Services

Data Protection for Microsoft 365

Dell PowerProtect Backup Services

- PowerProtect Backup Services helps some of the world's largest organizations protect their investment in Salesforce and address the gaps in data protection and recoverability. Dell PowerProtect Backup Services is a cloud-native data management solution that provides an essential layer of data protection functionality, to ensure that Salesforce data is protected and available.

The Challenge

It is a misconception that your Microsoft 365 data is automatically protected. Microsoft maintains a shared responsibility model, meaning they are responsible for maintaining platform uptime, while you are responsible for the protection and governance of your data. PowerProtect Backup Services for SaaS Apps complements Microsoft 365 by filling data protection gaps without additional hardware, software or resource IT operations like backup and recovery are often overlooked.

Microsoft 365 cloud-native data protection

PowerProtect Backup Services provides a scalable and cost-effective cloud-based platform to protect Microsoft 365 data, including Exchange Online, OneDrive for Business, SharePoint, Teams and Entra ID. It is a single solution for backup, long-term retention, federated search, compliance and eDiscovery.

Key Features

Agentless data protection

Microsoft 365 data is backed up directly from Microsoft Azure to the PowerProtect Backup Services platform on AWS and does not require agents.

Complete visibility

A single dashboard gives you complete visibility across Microsoft applications, providing the insight you need to ensure your data is protected and compliant.

Preservation of end user data

Data can be retained for inactive and terminated employees, eliminating the need to purchase and maintain additional Microsoft 365 licenses.

Self-service restores

Users are empowered to restore Exchange Online and OneDrive data without IT admin intervention.

Federated search

Search across Microsoft 365 users and endpoints to quickly locate sensitive files or confidential data that should be restricted or requires defensible deletion. for third-party backup and restore alternatives.

DELLTechnologies

Point-in-time recovery

Recover emails, OneDrive and SharePoint files to their original location from any time-based snapshot using a simple intuitive interface.

Compliance

Proactively monitor for potential regulatory violations such as GDPR, HIPPA and CCPA. Predefined, customizable templates and alerting enable quick remediation of violations.

Enterprise Data Security for Microsoft Entra ID

As the backbone of identity and access management (IAM) for Microsoft Cloud resources, Entra ID (formerly Azure Active Directory) is crucial for maintaining business continuity. PowerProtect Backup Services provides an efficient, automated and simplistic way to protect and recover Microsoft Entra ID objects.
