

ProDeploy Plus for Infrastructure

Simple, reliable IT deployment

Simplify IT Deployments with Confidence

Adding new IT infrastructure brings promise but also practical challenges. Complexity, integration headaches, and resource pressures can slow down progress. ProDeploy Plus is purpose-built for organizations that want a smarter, more predictable way to bring technology online without placing extra burdens on internal teams. Every deployment is guided by experienced professionals who know the value of your time and business continuity..

Benefits that Drive Real Results

Thorough site reviews and planning help eliminate common barriers before they impact your schedule. Professional deployment means environments are set up right from day one, following proven practices and tailored to your needs.

Security at Every Step

Safeguarding critical data and infrastructure is non-negotiable. ProDeploy Plus prioritizes security throughout the deployment journey.

Built-in protection: Security best practices guide each phase, from readiness checks to implementation details.

Actionable guidance: Receive recommendations to improve your environment's security posture and help close potential gaps before systems go live.

What Sets ProDeploy Plus Apart

Expert Project Management From Start To Finish

A dedicated project manager, located in your region, becomes your main point of contact. This support keeps your deployment coordinated and aligned with your business priorities at every stage.

Flexible, Around-the-clock Installation

Onsite hardware and software deployments align with your operational hours, not the other way around. ProDeploy Plus offers round-the-clock scheduling to keep deployment off your critical path and reduce business disruption.

Key Benefits

Accelerate technology adoption with expert execution from start to finish

3X

Faster deployment than DIY methods¹

58%

Reduction in technical support calls in the first 90 days²

Proactive Site Assessment

Infrastructure readiness reviews address requirements for power, cooling, and connectivity, removing surprises and ensuring your new investments fit seamlessly into your existing environment.

Complete Knowledge Transfer and Documentation

Deployment does not end at installation. Your team receives a walkthrough of the new infrastructure, comprehensive documentation, and answers to key operational questions for ongoing management.

Transparent, Real-Time Project Tracking

Use the Tech Direct online platform to view, manage, and collaborate on deployment progress. The portal makes it easy to review documentation, approve project steps, and stay connected with your deployment team.

Detailed Features for End-to-End Success

Feature	Description
Project Management	Regional manager oversees deployment, centralizing communication and accountability
Site Readiness Review	Confirms environment suitability before delivery and installation
Flexible Installation	Day or night, onsite setup for hardware and software as your operations require
Software Configuration	Onsite experts configure key systems and software for optimal performance
Security Implementation	Industry-standard security guidance at every deployment milestone
Post-Deployment Actions	Full deployment verification, documentation, and live knowledge transfer
Data Transfer	Automated handoff of configuration data for future support and troubleshooting

Partner for Success, Not Just Deployment

ProDeploy Plus is more than an installation service. You get scalable, expert-driven support that anticipates challenges and accelerates outcomes. Backed by experienced professionals and a practical, outcomes-focused approach, ProDeploy Plus helps you deliver secure, high-performing infrastructure that meets today's demands and tomorrow's growth.
