

Getting Started with SupportAssist for Business PCs in TechDirect

Get connected to SupportAssist for Business PCs to unlock the power of AI-driven, support automation.

Your AI-driven, PC support automation technology is SupportAssist. It's our smart technology that confidently keeps your PC fleet running its best anytime, anywhere. When you deploy SupportAssist via TechDirect, your PCs can now self-heal with our library of remediation scripts, and you get visibility to your entire fleet with telemetry-driven insights.

With ProSupport Suite for PCs, you unlock the differentiating technology that uses machine learning to remotely identify and resolve developing issues, before some even happen. And, did we mention, your experience is completely customizable to your business needs?

Centrally manage and monitor your PCs — anytime, anywhere — for uninterrupted PC performance

Remotely deploy SupportAssist to your fleet of PCs

Manage and monitor PCs centrally, unlocking additional features with the [ProSupport Suite for PCs](#)

Take the steps to get connected

Before getting started, review the [Deployment Guide](#).

Do you have what you need to deploy?

- Meet [minimum system requirements](#)
- A TechDirect account with administrator access
- Your proxy details
- A deployment tool (e.g. SCCM)

- 1** Sign in to [TechDirect](#) with your existing credentials, or set up a new account in minutes for first-time users.
- 2** Set up your company for **Connect & Manage in TechDirect**.
 - If you are a new user, you must associate your account with your company and enroll as a company administrator.
 - Enroll in the service by reviewing and accepting the Terms & Conditions.
 - Add technician users and designate roles for administration.
- 3** Configure your **download package** by completing the settings for how you will monitor and manage PCs across your environment.
- 4** Download your customized package, **launch** the deployment package manager, and **save** the package to your PC.
- 5** Use your **preferred deployment tool** to push SupportAssist to your fleet.
- 6** Start using **SupportAssist** to easily manage your Dell PCs and alerts, take action to update and optimize systems, and gain insight into the performance of your fleet.

Once connected, unlock the power to:

Get smarter support with AI that predicts and remediates

- Self-healing automation optimizes and resolves specific PC problems without human intervention or end-user disruption
- Resolve issues with real-time monitoring that proactively identifies and resolves issues
- Virtually eliminate unplanned downtime by predicting issues before they happen²

Deliver hassle-free experience anytime, anywhere

- Ensure productivity with updates to drivers, BIOS and firmware
- Optimize PC experience for your team
- Protect your environment with virus and malware removal

Keep your team productive with telemetry-backed recommendations

- Make better data-driven decisions based on refresh and utilization tracking
- Get ahead of disruptions with insight into performance impacting issues

Securely collect only the information needed to resolve issues

With security and privacy built-in, you're in control of authorizing what diagnostic information is collected. Diagnostics are kept safe during transport and storage with 256-bit encryption and firewall-protected one-way communication from your sites to Dell.

Custom catalogs for remote BIOS, driver and firmware updates			✓	✓
Proactive monitoring via <i>SupportAssist AI technology</i>				
Customizable dashboard in TechDirect portal	✓	✓	✓	✓
Fleewide view of security, health and application experience scores	✓	✓	✓	✓
Proactive and predictive hardware alerts with auto dispatch		✓	✓	✓
System-level performance and utilization analytics		✓	✓	✓
BIOS, driver, firmware and application version tracking for compliance		✓	✓	✓
PC inventory with sites and grouping for asset management		✓	✓	✓

Tips and Tricks

- Turn on **auto-update** during configuration to ensure you always have the latest version running in your environment.
- You can **configure sites** to deploy multiple configurations based on location, departments, preferences or test group requirements.
- By default, your SupportAssist agent runs in the background and doesn't interrupt employees. If you want to grant permission for users to interact with SupportAssist independently, you can **enable the end-user interface** during configuration.
- **Route alerts** to your existing tools, like ServiceNow.
- **Google® Chrome** provides the best experience for TechDirect.
