

Wyse thin clients for healthcare

Taking care of your data

Healthcare professionals need to securely access both their applications and patient records, regardless of location or available station. Thin clients enable secure and controlled access for healthcare professionals to their allotted applications and patient records anytime, from any station.

Wyse thin clients are highly secure and enable you to provide the very best care for your patients.

See how the new generation of Wyse thin clients allow you to focus on your patients rather than endpoints – through reduced costs, improved security, simpler administration and better performance.

Enabling you to offer the best care to your patients

100%

Controlled with Unified Endpoint Management from the cloud or datacenter

300%

Faster boot to login than their predecessors

2,100

Hours reclaimed, previously lost to boot to login screen¹

\$50k

Annual savings in lower power costs²

Wyse thin clients have a long-life cycle, working for 5 or more years.

Centralized management

IT able to manage resources, access, desktops and endpoints centrally

Simplify endpoint deployment through thin client plug-and-play installation and environment aware autoconfiguration

Images, software and BIOS updates managed unilaterally within the datacenter or cloud

Data available real time

Doctors, clinicians and support staff all able to access patient information real time in secure fashion

Thin clients allow medical facilities to adhere to strict data privacy regulations while providing anytime access to critical patient data

High performance graphics enable healthcare professionals to have traditional desktop like experience from any station

Resource utilization

Power and energy cost savings

Streamlined endpoint deployment and autoconfiguration prevents downtime at critical locations and times

Thin clients allow for multi-monitor use, improving productivity

Security

Thin clients able to be locked down to only necessary port access, improving security

Wyse ThinOS hardens the client and virtually eliminates cyber threats, making it the most secure thin client software in the industry

Compliance with regulations met by keeping patient information secure
