FAQs

VxBlock Central software provides a single, unified interface for VMware cloud operations.

Is VxBlock Central just Dell EMC Vision rebranded?
No. VxBlock Central is a feature-rich, next generation CI management solution providing comprehensive Awareness, Analytics and Automation capabilities and strong integration with VMware vRealize.

Do we have to migrate to VxBlock Central?
Yes. You must migrate to the new VxBlock Central software to stay up to date on the latest software features and security updates. No further software or security updates will be released for Dell EMC Vision.

Do we have to pay for VxBlock Central?
No. VxBlock Central Base, Workflow Automation and Advanced Analytics and Lifecycle Management capabilities are all available at no cost to VxBlock customers under active VxBlock support contracts.
