D∕ELL Technologies

Services enable solutions aligned to all your priority areas

AI

Accelerate the power of AI for your data. We work alongside you to build a roadmap, prepare data, implement a platform and support your Generative AI solutions.

Multicloud

Design, adopt and scale a multicloud operating model aligned to your business objectives, so you can focus on growth and innovation.

Modern Workplace

Plan, deploy, support, manage and automate leading-edge workplace technologies so your employees and business can thrive.

Modern Data Center

Quickly migrate, secure, manage and gain insights from your data — no matter where it resides.

Edge

Design, build, and manage a scalable, secure edge so you can grow your business faster with one trusted partner.

Security

Shift to a proactive approach and reduce your attack surface to achieve a resilient, non-stop digital business.

Sustainability

Protect your data, safeguard your brand reputation, get value back, reuse precious materials, and responsibly recycle with secure recovery and recycling services for retired equipment.
