

Lay the foundation for secure knowledge assistants at enterprise scale

The challenge:

Knowledge is everywhere. Answers are not.

- › Enterprise data continues to grow
- › Expertise is trapped in siloed systems and teams
- › Employees search and ask around
- › Experts' time is valuable and limited
- › Team productivity slows

What are knowledge assistants?

Secure, enterprise-grade chatbots that retrieve, reason, and cite enterprise data to deliver trusted answers and insights

The opportunity isn't just faster search. It's securely democratizing expertise across the enterprise.

- Grounded, cited answers in seconds
- Ingest and analyze data from a range of sources
- Reduce dependencies and bottlenecks
- Maintain complete control of your data
- Scale trusted knowledge across your organization

Supports diverse use cases

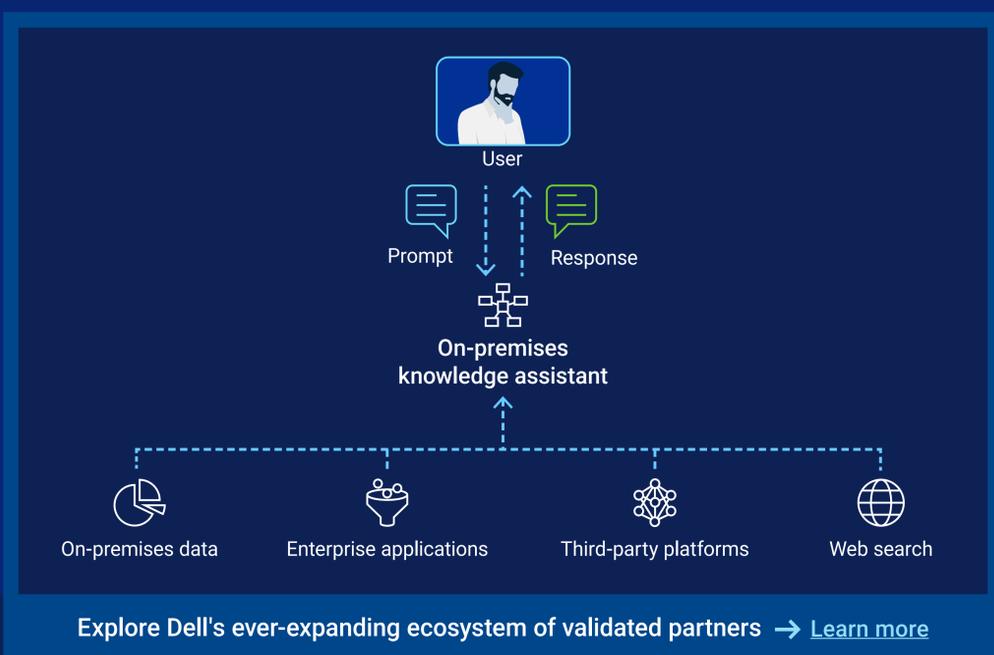

HR	FINANCE	IT	MARKETING
CUSTOMER SUPPORT	SALES	PROCUREMENT	ENGINEERING

Accelerate knowledge assistant adoption with Dell

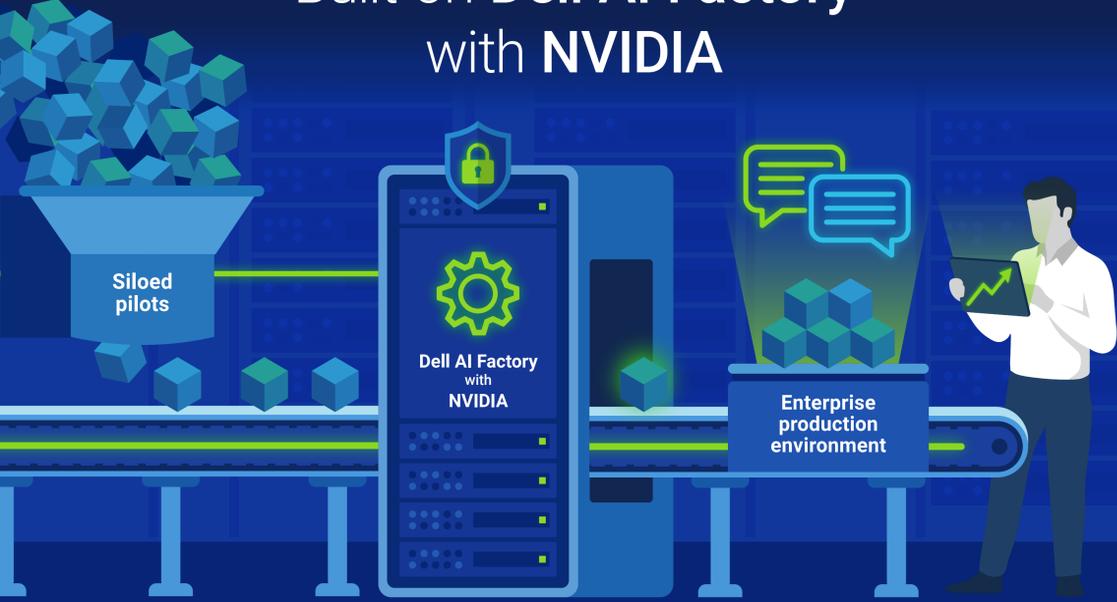

Dell helps lay the foundation to design, deploy, and manage secure knowledge assistants across the enterprise

- › Rapidly deploy validated partner solutions via blueprints available in the **Dell Automation Platform** catalog
- › Keep sensitive data under your control with on-premises deployments
- › Take advantage of Dell and partner services to plan, deploy, and manage your knowledge assistant solution
- › Rapidly scale from departmental pilots to enterprise production with modular architectures

Built on Dell AI Factory with NVIDIA

Fully validated solutions deployed on modular infrastructure

Broad use case support

One solution, many outcomes

Easy deployment

Automated to accelerate and optimize

Enterprise flexibility

Start small, scale with pre-defined modules

Engineered for enterprise-grade knowledge assistants at scale
