- Get more value out of your Microsoft 365 and Microsoft Teams investment
- Accelerate the implementation and adoption of Microsoft Teams Rooms

The evolution of collaboration spaces

As organizations look to leverage solutions that enable dynamic teams to communicate and collaborate within the workplace, Microsoft Teams continues to be an attractive choice because of its pre-integrated ecosystem within Microsoft 365—which makes it extremely easy to set up meetings using Outlook calendars, email, or chat. Microsoft Teams, the chat-based collaboration platform, is complete with document sharing, online meetings, and many more extremely useful features for business communications.

However, the meeting experience continues to change, and the use of collaboration conferencing solutions has exploded. Today's modern workforce is shifting dramatically in many ways; most notably, into hybrid work environments*. Physical meeting rooms are expected to have meetings running with some portion of attendees being remote.

So, how do we collaborate and get things done when our workforce is distributed across multiple locations? Microsoft Teams Rooms help deliver people-centric, collaborative meeting experiences for participants joining from the meeting room or remotely. Teams Rooms create an inclusive experience for people in the room and remote viewers alike with features such as live captions and together mode. It provides a complete meeting experience that brings HD video, audio, and content sharing to meetings of all sizes, from small huddle areas to large conference rooms and allows organizations to transform meeting spaces ranging from small huddle areas to large conference rooms with a rich, collaborative Teams experience that's simple to use. Harnessing these rich capabilities requires the skills of an experienced Microsoft partner.

Dell Technologies Services can help you deploy and fully adopt Microsoft Teams and Teams Meeting Rooms to maximize its potential to create an integrated meeting solution that reshapes the collaborative environment into a simple, consistent, and reliable experience.

Introducing Dell Video Conferencing Room Solutions for Microsoft Teams Rooms

Dell Video Conferencing Room Solutions for Microsoft Teams are intelligent, validated solutions that improves teamwork and productivity by transforming existing conference rooms into smart, secure connected meeting spaces. This enables you to transform group collaboration in any meeting space with a total conference room solution that includes Logitech Room Solutions and Dell Large Format Monitors powered by the unmatched performance of Dell OptiPlex Micro. This total conference room solution has been tested and validated—no more guessing games and messy hodgepodge configurations, our Dell team has made sure of it.

There are three configurations; one for a small, medium and large meeting space depending on your business needs and budget. Dell Video Conferencing Room Solutions are all tested and validated to work out of the box for easy deployment and manageability. All solutions provide a seamless collaboration experience remote or in the office with one-touch join, easy content sharing and center of room control.

Services to accelerate implementation and customer success with Dell Video Conferencing Room Solutions for Microsoft Teams Rooms

Dell Technologies Services can help enhance your meeting room experience with Dell Video Conferencing Room Solutions for Microsoft Teams Rooms. Our services are designed to accelerate your deployment, adoption, and success with Microsoft Teams Rooms. We offer two services to help you use the integrated meeting solution to reshape your collaborative environment into a simple, consistent, and reliable experience for all of your employees, remote and on-site. The two services provide expert assistance for the initial setup, configuration and integration of Dell Meeting Space Solution for Microsoft Teams Rooms and ensure that the solution for Microsoft Teams Rooms is properly configured and validated within your existing Microsoft 365 Teams tenant.

Microsoft Teams Rooms Platform Readiness Service helps customers review and understand best practices for the configuration of the Microsoft Teams Rooms settings in their Microsoft Office 365 tenant and determine their overall readiness. This service prepares the Microsoft Teams Rooms deployment with several critical, central tasks within the Microsoft Office 365 Teams tenant. At the conclusion of this service, a readiness report is delivered; it captures the overall readiness requirements and status of the environment.

The Dell team will provide best practices for organizational units and Active Directory group(s) for your Microsoft Teams Rooms machine and service accounts, as well as Group Policy objects (GPOs). Additional tenant preparation includes items such as the creation of dedicated and unique resource accounts that must be enabled for both Microsoft Teams and Exchange to support Microsoft Teams Rooms devices.

Microsoft Teams Rooms Implementation Service is designed to accelerate the implementation of a Microsoft Teams Room solution for each conference space in a customer's environment. This service verifies configuration and functionality for each Dell Meeting Space Solution for Microsoft Teams Rooms across all your locations.

This implementation service includes the following activities:

- Validation of prerequisites and readiness
- Microsoft Teams Rooms app setup and initial configuration
- Additional optional configuration such as Active Directory domain join, account configuration, and needed customization
- Microsoft Teams Room functional verification

Together, these two services will accelerate adoption of your Dell Meeting Space Solution for Microsoft Teams Rooms—a smart, secure, connected meeting space solution with compute, software and hardware all in one.

- Simple, validated solution for any meeting space
- Supported by a three-year hardware warranty for Dell devices and optional ProSupport
- Supports Dell's smallest, most powerful commercial desktop—the OptiPlex Micro for compute, enabled with the unmatched screen performance of Dell Large Format Monitors, superior audio and visual technologies of Logitech Room Solutions with today's top collaboration software solutions from Microsoft Teams Rooms

Elevating your entire Microsoft 365 ecosystem

Finally, we offer a wide range of services for Microsoft Teams and Microsoft 365 to help customers drive business outcomes. Dell's services include deployment, migration and adoption & change management services for Microsoft 365 including additional use cases such as Microsoft Teams Calling & Meetings and Digitizing Business Processes on Teams with Power Platform. Dell can take your conference spaces to the next level by supporting advanced services for 3rd party integrations including executive meeting spaces and large board rooms which may contain unique requirements and integrations. Because conferencing and collaboration has become a critical IT service for most organizations, Dell offers managed services for every aspect of Microsoft 365.
