The PowerScale Hybrid family includes Dell EMC PowerScale platforms and the Dell EMC Isilon platforms configured with the PowerScale OneFS operating system. OneFS provides the intelligence behind the highly scalable, high-performance modular storage solution that can grow with your business. A OneFS powered cluster is composed of a flexible choice of storage platforms including all-flash, hybrid and archive nodes. These solutions provide the performance, choice, efficiency, flexibility, scalability, security and protection for you to store massive amounts of unstructured data within a cluster. The PowerScale hybrid platforms co-exist seamlessly in the same cluster with your existing Isilon nodes to drive your traditional and modern applications.

PowerScale H700 and H7000

Isilon H400, H500, H5600 and H600

PowerScale family of hybrid storage platforms powered by the OneFS operating system uses a versatile yet simple scale-out architecture to speed access to massive amounts of data. The hybrid platforms are highly flexible and strikes the balance between large capacity and high-performance storage to provide support for a broad range of enterprise file workloads. The hybrid storage platforms are available in four product lines:

- **PowerScale H700:** Provides maximum performance and value to support a demanding file workloads. The H700 provides capacity up to 960 TB per chassis. The H700 includes inline compression and deduplication capabilities
- **PowerScale H7000:** This versatile, high performance, high capacity hybrid platform with up to 1280 TB per chassis. The deep-chassis based H7000 is an ideal to consolidate a range of file workloads on a single platform. The H7000 includes inline compression and deduplication capabilities
- **Isilon H400:** Provides a balance of performance, capacity and value to support a wide range of file workloads. The H400 delivers up to three GB/s bandwidth per chassis and provides capacity options ranging from 120 TB to 960 TB per chassis.
- **Isilon H500:** This versatile hybrid platform delivers up to five GB/s bandwidth per chassis with a capacity ranging from 120 TB to 960 TB per chassis. The H500 is an ideal choice for organizations looking to consolidate and support a broad range of file workloads on a single platform.
- **Isilon H5600:** Combines massive scalability – up to 1.28 PB (raw) per chassis – and up to eight GB/s bandwidth – in an efficient, highly dense, deep 4U chassis. The H5600 also includes inline compression and deduplication capabilities. The H5600 is designed to support a wide range of demanding, large-scale file applications and workloads.

- **Isilon H600:** Designed to provide high performance at value, delivers up to 120,000 IOPS and up to 12 GB/s bandwidth per chassis. The H600 is ideal for HPC workloads that don't require the extreme performance of all-flash.
