

# CANADIAN ENGINEERING FIRM BUILDS CLOUD-BASED DATA PROTECTION

The Nuna Group of Companies reduces costs, speeds backups and increases scalability with an end-to-end, centrally managed data protection solution spanning cloud and on-premises environments

**COMPANY:** Nuna Group of Companies  
**INDUSTRY:** Construction and engineering  
**COUNTRY:** Canada

## CHALLENGE

Implement a **backup solution** that lowers the cost of storing backups in the cloud, delivers faster backups and increases scalability

## SOLUTION

Dell EMC Data Domain

Dell EMC Data Domain Virtual Edition

Dell EMC Data Protection Software

Partners: VMware, Microsoft (Azure)

## BENEFITS

50% reduction in backed-up data with data dedupe

Lowers the cost of storing backups in the cloud

Completes 93% of backups in under an hour

Centrally manages on-premises backups and long-term data retention in the cloud

Scales backup storage capacity to match business demand with ease

“By centralizing our on-premises backups and long-term data retention in Azure, Dell EMC Data Protection has improved data availability and scalability while lowering costs. It’s been a huge win all around.”

- Darryl Turner, IT Manager, Nuna Group of Companies
