

Dell thin client solutions

for Education

Protecting and enriching the learning experience.

Enhance the student and teacher experience across learning programs with innovative, cost effective and secure strategies for delivering flexible computing resources.

Dell thin client solutions empower schools, colleges or universities – through improved security, simpler administration and better performance for staff, educators and students.

Virtual workspaces combined with Dell thin client solutions provide a simple way to seamlessly deliver access to labs, applications, services, and resources, enabling a mobile workstyle that improves student engagement, provides the tools for staff to work more efficiently and helps IT to resolve issues more quickly.

DELL Technologies

For Education

Use Cases

Administration

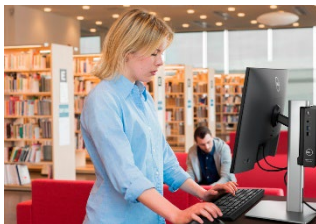

Manage devices and your environment efficiently and flexibly while improving uptime and user experience.

Computer labs

Students can create, problem-solve and collaborate in interactive learning spaces, while using digital tools and resources provided by virtual desktops.

Library systems

Kiosk mode allows access to library resources or digital workspaces for students and educators.

Create a more secure and agile learning environment.

Cost effective, simple, centralized management

Provide flexible, reliable user desktops and minimize your IT management burden. With centralized management, IT teams can consolidate lab space, introduce new applications quickly, and deploy patches, updates or changes on the fly.

Collaborate in interactive learning spaces

Want to provide access to graphics-intensive applications efficiently and consistently across the entire network? With Dell thin clients' virtual graphics capability, students can access sophisticated, high-end 3D applications from any device.

Hardened security

Reliably protect the endpoints against viruses and malware in an environment of increasing security risks. All data and apps are centrally managed and controlled in the data center, not classroom devices. This better protects the network from malicious attack.

Enhance your digital workspaces with more security and agility
