

Rise Up to Cloud

Without Compromise

Run RISE with SAP on Dell APEX
in your data center

RISE with SAP® enables on-premises ERP customers to customize their transformation and modernize operations through SAP Cloud ERP.

Future-proof your business
with transformation
as-a-Service.

Accelerate innovation
with a quick value
obtainment.

Achieve predictable, lower TCO
with pricing and
infrastructure
optimization.

SAP is partnering with Dell Technologies to give you the option of running RISE with SAP on Dell APEX for the multicloud experience your business needs.

Top 3 reasons to choose Dell APEX for RISE with SAP

Take your cloud journey, your way, with
Dell Technologies and SAP

No matter which path to cloud you follow, you'll get there faster with
SAP-certified Dell infrastructure, delivered via Dell APEX.

1. Value

Shift the focus from
managing IT to delivering
better business outcomes.

Speed access to more data
with SAP instances on purpose-built Dell servers.

Simplify the service experience
with quick provisioning and a modern
consumption model.

Improve operational efficiencies
with Dell energy-efficiency innovations designed
with sustainability in mind.

**Streamline lifecycle management and
integrate seamlessly**
Offload time-consuming, manual tasks to Dell
APEX—tailored to your specifications—to accelerate
outcomes and simplify operations.

2. Innovation

Respond and adapt to
ever-changing business needs
with agility.

Deploy flexibility
in data centers, colocation facilities or
multicloud locations.

Contain costs and scale dynamically
with a pay-per-use model and the ability to spin
up SAP-validated systems in minutes.

Accelerate AI
by leveraging Dell AI factory and dell data
lakehouse.

3. Security

Reduce risks with end-to-end
control and protection for SAP
landscapes and data.

**Rely on on-premises cloud solutions
from Dell Technologies**
to enhance data sovereignty and ensure critical data
stays within the organization.

Safeguard intellectual property
and meet stringent industry regulations without
relying on third-party environments.

Extend cyber resiliency
and take control of your security via
threat-detection services.

The power of partnership

Dell Technologies and SAP are driving next-generation
capabilities from the edge to the core to the cloud.

**Modernize SAP without
hyperscaler lock-in.**

SAP S/4HANA Cloud,
Private Edition on Dell in
your data center offers
cloud agility without
vendor lock-in or rising
hyperscaler costs.

**Accelerate SAP
innovation with AI and
edge computing.**

Dell's infrastructure
powers real-time data
processing and
automation, driving
faster insights and
smarter decisions for
SAP workloads.

**Unlock the full value of
SAP data with integrated
analytics.**

Through partnerships with
SAP Business Data Cloud
and Databricks, Dell
enables unified,
insight-driven operations
across SAP and non-SAP
data.

Claim your home cloud advantage

Attain cloud capabilities while keeping your SAP landscape in your own data center with
Dell APEX, giving you the power of joint Dell Technologies and SAP solutions with
pay-per-use flexibility to handle enterprise scale.
