

Flexible. Predictable. Smart.

Our payment solutions help deliver end-to-end security.

See how Dell Financial Services can enhance mid-market remote workforce with PC as a Service, Payment Flexibility and Technology on Demand. **

Across the Dell Technologies payment solution portfolio, we are offering flexible financing options to extend your budget and help you quickly get the hardware, software, services and support you need. Protect your IT ecosystem with the latest, advanced security technologies and features.

1 PC as a Service

Acquire the devices you need to support the business with one price per seat per month. Combine services and hardware into a single payment to provide predictable budget planning and reduced IT effort. Simple deployment with quick migration allows for uninterrupted workflow.

Up-to-date security

Efficient deployment

Predictable budgeting

2 Payment Flexibility

Purchase IT to enable remote work today and pay over time to better manage cash flow. Dell Financial Services payment solutions allow for immediate IT acquisition with low rate financing, available deferrals, and flexible term options that best fit your organization's needs.

Low-rate financing

Payment deferrals

Term-length options

3 Technology on Demand

Pay for the technology you use, freeing budget for strategic investments and business operations. Enjoy choice and assurance in IT infrastructure consumption. Commitment- and usage-based solutions help you stay aligned with organizational goals while paying only for what you use.

Less over-promising

Payments set by usage or structure to drive outcomes

“Rethinking device procurement can impact the transformation of your workforce.”

- Financial solutions to enable your PC lifecycle strategy; An IDC Infobrief sponsored by Dell Technologies; February 2019

Manage your technology lifecycle while optimizing cash flow with Dell Financial Services payment solutions.

Find all the ways Dell Technologies can help you secure your business.
