

CloudIQ

Accelerate IT Operations
with CloudIQ – AIOps for Intelligent Infrastructure Insights.

CloudIQ – proactive monitoring, machine learning and predictive analytics for Dell Technologies server, storage, data protection and network infrastructure.

CloudIQ combines human and machine intelligence to simplify and accelerate operations in increasingly complex IT environments.

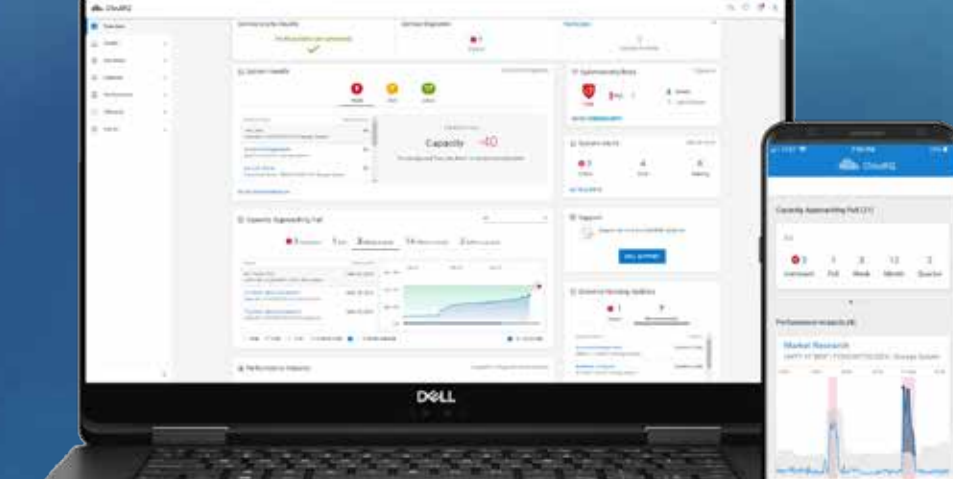

REDUCE RISK

PLAN AHEAD

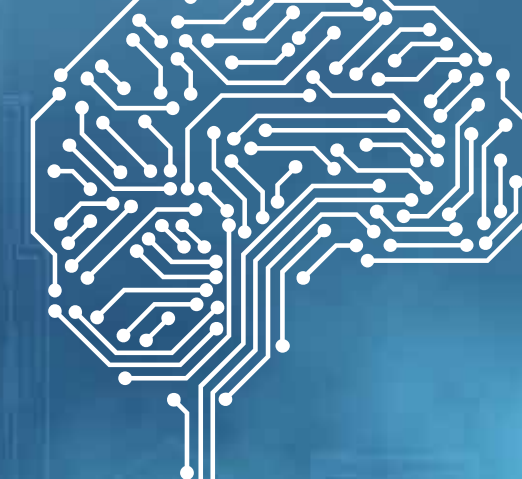

IMPROVE PRODUCTIVITY

HUMAN INTELLIGENCE

+

MACHINE INTELLIGENCE

2X to 10X faster time-to-resolution¹

Reduce Risk

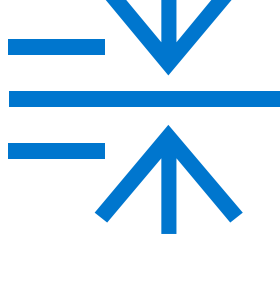

Proactive Health & Cybersecurity Monitoring

Consolidates scores for prioritizing actions. Notifications with recommendations speed time-to-resolution.

Performance Impact Analysis & Anomaly Detection

Machine learning for identifying abnormal performance. Time-series correlation and visualization for incidents that impact IT.

Workload Contention Identification

Isolates performance latency spikes and other issues causing workload contention. Highlights components in the data path for root cause.

Plan Ahead

Short-term Capacity Full Prediction

Machine learning based on seasonality predicts consumption and adjusts over time. Predicts three months ahead.

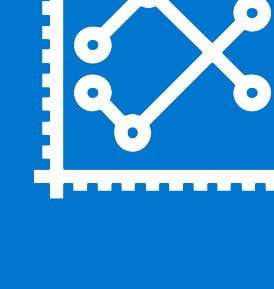

Longer-term Capacity

Extends capacity prediction in increments from 3 months to 2 years.

Capacity Anomaly Detection

Identifies threats of imminent full capacity and corrective actions to avoid data unavailability due to oversubscription.

Improve Productivity

Breadth of Coverage

Single, secure portal for proactively monitoring servers, storage, data protection, network, and CI/HCI enterprise-wide; data storage as-a-service; and data protection in public clouds.

Communication & Collaboration

Proactive notifications with recommendations, customizable reports for scheduling/distributing and shareable dashboards that improve productivity.

Integration for Automated Workflow

REST API and Webhook send notifications and data to 3rd party tools to accelerate IT, DevOps and business outcomes.

AIOps across your IT Environment

Compute, storage, data protection network & virtualization

Accelerate IT with Intelligent Insights

“CloudIQ is changing the infrastructure management game, combining the right level of telemetry with machine learning and APIs to provide actionable insights and integrated automation to accelerate IT.”

Scott Sinclair, Senior Analyst, Enterprise Strategy Group

“With 16 hours saved per week, CloudIQ helps improve productivity, and that frees us to spend more time on performance tuning and on R&D for new products.”

Darrel Schueneman, Manager, Cloud Operations, Plex Systems

“CloudIQ speeds time-to-resolution of performance, capacity, availability and other issues by 2X to 10X, and saves IT one workday (9 hours) per week on average.”

CloudIQ User Survey¹

CloudIQ comes with Dell ProSupport and ProSupport Plus Services at no additional cost. For demos, data sheets and white papers visit:

www.DellTechnologies.com/CloudIQ

¹Based on a Dell Technologies survey of CloudIQ users conducted May through June 2021. Actual results may vary.
