

# Increase time to value and discover the path to a more secure multicloud environment with Dell Technologies and Red Hat

Organisations across industries are realising that their competitive edge lies in their ability to deliver applications that drive revenue, capture cost efficiencies and enhance the user experience.

Managing the complexity of multicloud environments, maintaining security and compliance, and controlling costs are constant challenges that organisations are increasingly trying to navigate.

However, achieving a consistent operational experience across diverse cloud platforms is crucial to fully capitalising on the power of containerised applications.

Dell APEX Cloud Platform for Red Hat OpenShift provides faster time to value, simplifies operations and ensures a more secure environment, enabling the rapid development and deployment of revenue-generating apps.

## A trusted partnership

### Dell APEX Cloud Platform

The solution that simplifies IT management, optimises costs and accelerates your digital transformation.

Reduce the time and resources needed for procurement, deployment and maintenance of on-premises infrastructure.

Quickly deploy and scale your IT services to seize new opportunities and stay ahead of the competition.

### Red Hat OpenShift

A consistent, secure and scalable foundation for building and running your cloud-native applications across hybrid and multicloud environments.

Enjoy a unified Kubernetes platform, enabling you to deploy cloud-native apps without vendor lock-in and supporting your organisation's hybrid strategy.

OpenShift provides a highly secure and compliant platform to confidently run your production workloads.

### Dell Technologies and Red Hat have been innovating together for 25 years.

The cutting-edge Dell APEX Cloud Platform for Red Hat OpenShift combines industry-leading hardware from Dell Technologies with open source software excellence from Red Hat to deliver a consistent hybrid cloud experience.

# More time on apps. Less time on infrastructure.

Embrace a transformative approach that puts you in the driver's seat, empowering you to mould your cloud environment with precision, control and consistency.

## Consistency

Streamline management and uphold standards

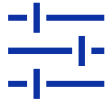

As you scale operations across diverse clouds, you can enforce consistent governance models, security policies and operating procedures.

## Choice

Choose the ideal infrastructure for each application

Enjoy the freedom to strategically place workloads across any cloud environment, maximising performance, cost efficiency and security.

## Control

Strike the perfect balance between agility and authority

Maintain robust visibility and control over your entire hybrid cloud landscape from a centralised management plane, without sacrificing oversight or security.

## Delivering lasting impact across your business

Dell APEX Cloud Platform for Red Hat OpenShift allows businesses to optimise workload placement, accelerate application delivery, and simplify deployment and operations – all while ensuring centralised management and oversight.

### Simplify deployment and operations

With automated provisioning and unified lifecycle management capabilities, you can reduce overhead and accelerate time to value across all clouds.

### Optimise workload placement

Maximise efficiency and returns on investment with intelligent workload placement, ensuring your applications reside in the ideal infrastructure.

### Accelerate app delivery

Your teams can rapidly build, deliver and iterate new applications and services through frictionless provisioning and dynamic scaling across any environment.

### Bridge the cloud divide

Intelligent automation and orchestration enable IT teams to be more efficient using a cloud-like operating model on premises.

## Discover your path to intelligent infrastructure today
