Modernize enterprise applications with VMware Tanzu on Dell EMC VxRail

The journey to containerize Microsoft SQL Server, starting with SQL Server 2019

1. Run SQL Server VMs alongside K8s
   - Containerize one SQL Server instance at a time and add more at your own pace

2. Replatform to cloud native
   - Replatform data and applications to cloud native with Kubernetes

3. Multi-cloud of SQL Server & K8s
   - Run SQL and K8s across multi-cloud and multi-cluster environments

4. SQL Server Big Data Clusters inside K8s
   - Leverage distributed data analytics to do more processing at scale

VMware Tanzu on VxRail

Fast and simple path to application modernization

**ACCELERATE ADOPTION**

- Automate Kubernetes infrastructure deployment and provisioning accelerating developer productivity
- 15 minutes to add new VxRail nodes to a cluster

**RAPID K8s EVOLUTION**

- Lock step support for latest VMware Kubernetes advancements

**K8s YOUR WAY**

- Choice of infrastructure delivery options across private cloud, public cloud, and edge locations that align to your organization’s operating model

**30 day**

- Synchronous release with VMware

**Only Vendor**

- Offering fully integrated reference architecture, cluster, and private cloud offerings
