Expect Exceptional Productivity

VxRail powers exceptional VMware HCI performance and agility, reducing complexity and delivering a productivity boost for both your IT and business teams. Any workload, any platform, all enabled.

*To run on RAID 5

**Dell Technologies Claim #G20000028

We can spin things up faster with VCF on VxRail. We’re taking days vs. weeks.

92% LESS DOWN TIME

44% FASTER DEPLOYMENT TIME

… and continues to raise it.

Focus on your high value business tasks.

Engineered, managed and supported as one. Automating operations and lifecycle management, so you don’t have to.

400+ dedicated VxRail team members delivering the curated experience.*

Over 25,000 runtime hours to test each major release.*

How do we do this?

Over $60 million of lab investments.*

Single click upgrades unleash software and hardware performance while simplifying administration.

We’ve seen great efficiencies in our operations with Dell EMC VxRail. We’re managing a lot of systems with fewer people. We’re much more efficient in how we deploy and maintain systems… Overall, we’re looking at 20-30% efficiency gains.

Database log acceleration.4

50% Faster

Lower price per node 4

Up to 33%

Increase in VM consolidation 4

OLTP response time4

More than 1M IOPs and 5GB/s throughout.4

5.3x Faster disk build

MORE IOPS FOR SEQUENTIAL WRITES 5

Power for mission critical workloads*

93% less maintenance

We’re getting a lot more hours back with Dell EMC VxRail because we don’t have to worry about interoperability and compatibility issues during upgrades.

We're getting a lot more hours back with Dell EMC VxRail because we don’t have to worry about interoperability and compatibility issues during upgrades.

Improved agility drives higher developer productivity

Dell EMC VxRail has made it so much easier and affordable to robustly deploy. We’re able to scale out as we see fit, in a much smaller footprint that takes up far less space, and we can sign on new resources with ease.

What we’ve seen good efficiencies with are the Dell EMC VxRail workload systems with fewer people. And we’ve noticed a significant benefit in how we’re utilizing at Dell EMC’s innovative offices.
