

# SaaS platform for data protection and cyber resilience

## Protecting data efficiently is an industry-wide challenge

## SaaS platform to protect your data wherever it lives

**Data protection**  
Simple, scalable, secure

- Backup and restore
- Disaster recovery
- Archive

**Cyber resiliency**  
Accelerated ransomware recovery

- Air-gapped backups
- Incident response readiness
- At scale recovery

**Data governance**  
Automated, predictive intelligence

- Compliance monitoring
- eDiscovery support
- Federated search

## Single console with visibility to all cloud workloads

**SaaS Apps**

- Microsoft 365
- Google Workspace
- Salesforce

**Endpoints**

- Laptops
- Desktops

**Hybrid Workloads**

- Virtualization
- Databases
- NAS
- Cloud-native

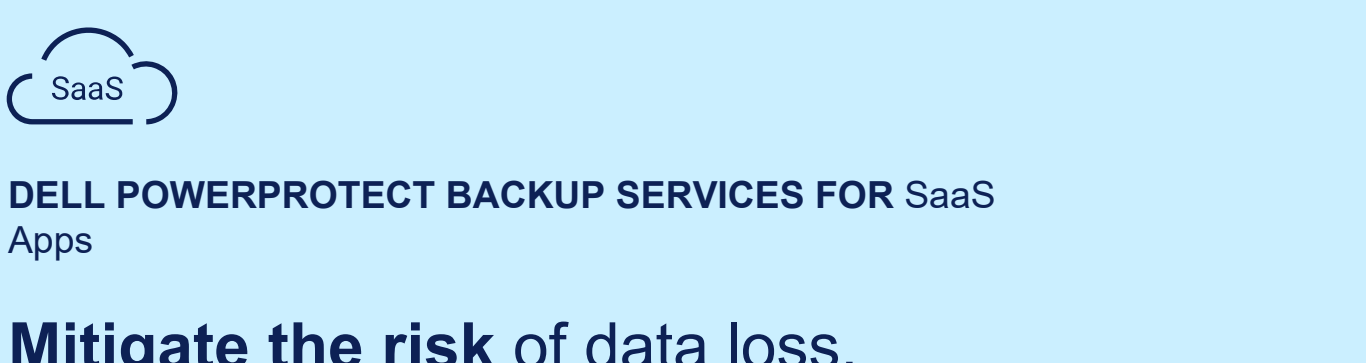

## Data protection for SaaS apps, endpoints and hybrid workload

Respond to key business initiatives and data growth with agility

**Deploy** in minutes

**Scale** on demand

**Reduce** cost and complexity

**DELL POWERPROTECT BACKUP SERVICES FOR SaaS Apps**

Mitigate the risk of data loss, ensure regulatory compliance and improve data visibility

- eDiscover
- Automated Compliance
- Federated Search

**Microsoft 365**

Get unified data protection and governance for Microsoft 365 applications (Exchange Online, OneDrive, Teams, EntraID Sharepoint).

**Google Workspace**

Obtain secure, scalable, cloud-native backup and disaster recovery for Google Workspace without sacrificing security or compliance.

**Salesforce**

Achieve complete data protection and address recoverability gaps for Salesforce users with a cloud-native data management solution.

## Centralized, secure protection of your remote business data

With the increase of critical data being stored remotely, it's important to have an endpoint backup plan.

**Protect your data no matter where it goes**

- Quickly locate lost or stolen devices with geo-tracking
- Rapidly recover entire device from snapshot

**Ransomware recovery**

- Identify and automate data protection for key business assets
- Secure data in flight and at rest

**Data security and compliance**

- Federated search across all backup data
- Automated and proactive compliance monitoring
- Data encrypting at rest and in transit

**DELL POWERPROTECT BACKUP SERVICES FOR HYBRID WORKLOADS**

Protect your on-prem and cloud-based workloads directly to the cloud

- Long-term Retention
- Reporting
- Storage Insights

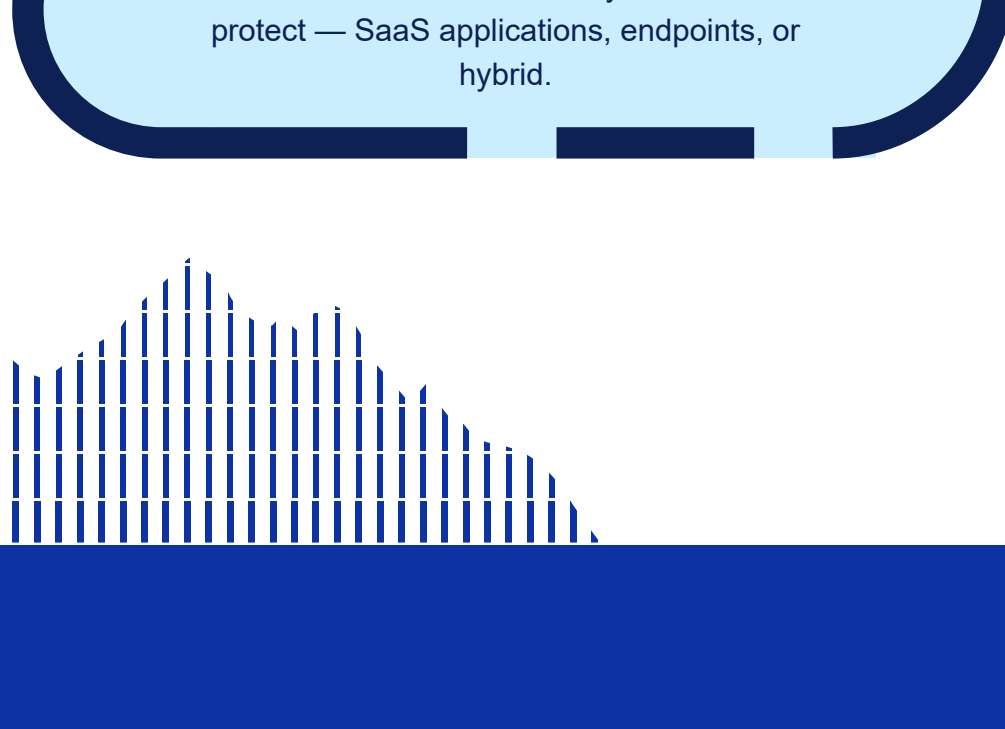

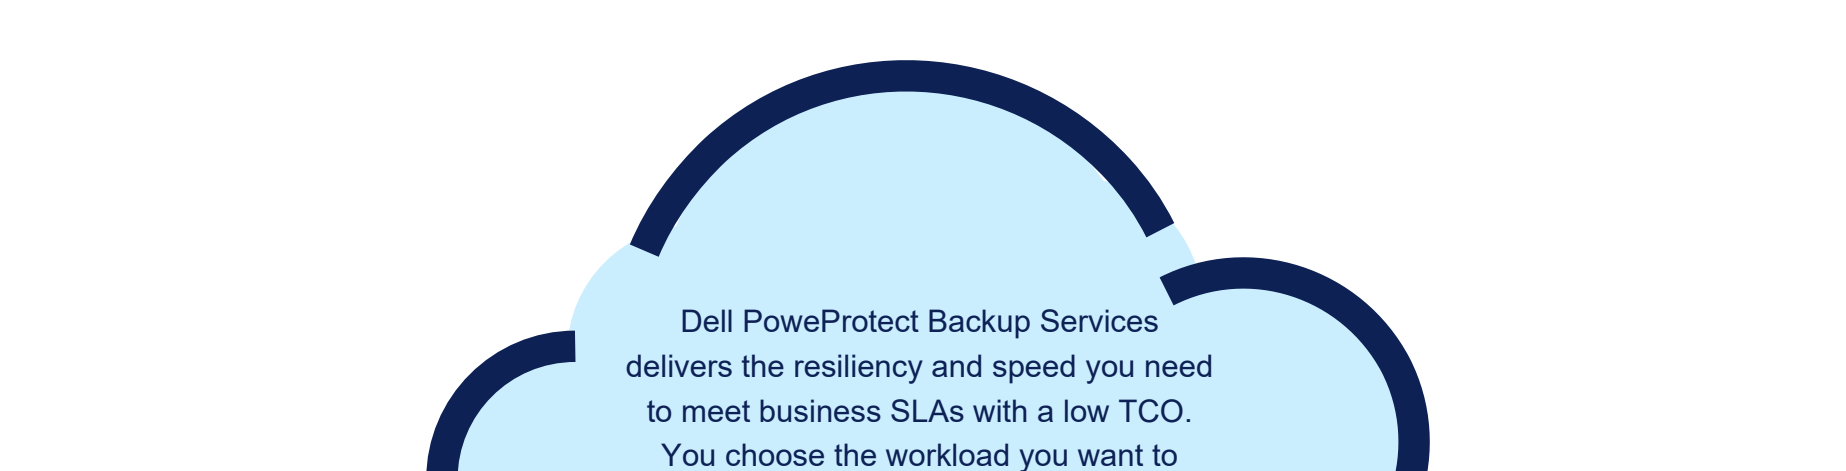

**Transform data center backup and disaster recovery for virtual environments (VMware and Hyper-V)**

**Reduce the cost and complexity of data protection for enterprise databases (Oracle, MS SQL and SAP HANA)**

**Discover a more cost-efficient way to protect on-premises and cloud based network attached storage devices**

**Protect your cloud-native workloads from data loss and cyber-threats with simple, scalable, snapshot orchestration, air-gapped backup, and disaster recovery**

## Simple User Experience

Dell PowerProtect Backup Services delivers radically simple data protection as-a-Service enabling your business to simplify your day-to-day by eliminating infrastructure management and ensuring all-in-one secure protection with backup, disaster recovery, and cyber resilience.
