DELL COMMERCIAL DOCKS

Power your productivity.

DELL COMMERCIAL DOCKING FAMILY

Dell Commercial Docks boost productivity for end users by making it easy to connect to and charge their PCs faster. Our docks are easy to deploy, manage and upgrade so IT staff can be more productive as well.
Work at full speed
DELL COMMERCIAL DOCKS

Increase your power delivery and charge quicker with docks that deliver 90, 130, or 210 Watts of power. Our incredible ExpressCharge technology allows for an 80% charge on your PC’s battery in one hour¹. Get more done even faster, with Dell ExpressCharge Boost, a feature that provides up to a 35% charge in just 20 minutes² on compatible systems.

Enhance your productivity with the World’s most powerful docks³. Do your best work faster with a dock that offers the ability to connect to multiple monitors and peripherals all with a single cable to the PC. Dell Commercial Docks offer the greatest compatibility across Dell Commercial laptops. WD19S docks and WD19TBS docks are also compatible with notebooks from other manufacturers such as HP and Lenovo which support industry standards for USB-C docking and Thunderbolt docking* respectively.

For functional limitations with notebooks from other manufacturers in comparison to Dell Commercial notebooks, please see this support article.

Streamline the deployment and management of all of the docks in the family, regardless of their connectivity with a single firmware. Dell’s docks are support enabled in our laptops’ BIOS from the factory. Perform firmware updates in minutes without needing to reboot the system, allowing end users to continue working without disruption.

Dell offers the World’s first modular dock with upgradeable connectivity and power⁴. By allowing you to easily upgrade your connectivity and boost your power delivery to meet the future needs of your evolving PC environment, you can significantly reduce your upgrade costs.

Dell Commercial Docks come with a standard, 3 Year Limited Hardware Warranty with Advanced Exchange⁵. If the customer has an issue that cannot be resolved over the phone, Dell will send a replacement dock the next business day. Dell offers the option for customers to extend this warranty up to 4 or 5 years for an additional fee.
Enhance your productivity with the World’s most powerful USB-C® docks with Dell ExpressCharge for faster charging. USB-C technology delivers data transfer speeds of up to 10Gbps and supports up to three Full HD displays so you can work more efficiently.

Boost your PC’s power up to 210W on the World’s most powerful dual USB-C dock. Get the flexibility you need with magnetically separable USB-C cables. Use both connections for dual USB-C functionality that is compatible with select Precision Mobile Workstations for the fastest charging and the ultimate computing performance.

Conveniently dock any laptop equipped with USB-C® or USB-A ports with the Dell Universal Dock and connect up to three 4K displays simultaneously.
Dell Commercial Docks

Future-ready design

Dell offers the World’s first modular dock with upgradeable connectivity and power. By allowing you to easily upgrade your connectivity and boost your power delivery to meet the future needs of your evolving PC environment, you can significantly reduce your upgrade costs.

Dell Thunderbolt™ Dock WD19TB / WD19TBS Module

Need more power in the future? Upgrade to the WD19TB / WD19TBS module for Thunderbolt connectivity with up to 130 Watts of power delivery, 40Gbps data transfer speeds and support for up to three displays at a fraction of the cost of replacing the entire dock.

Dell Performance Dock WD19DC / WD19DCS Module

Upgrade to the WD19DC / WD19DCS module in the future to increase your power delivery up to 210 Watts for use with Precision Mobile Workstations at a fraction of the cost of replacing the entire dock. The single connector can also be used with all Dell commercial laptops for ultimate compatibility in your PC environment.

Compatible with Precision Mobile Workstations and Latitude or XPS systems with single USB Type-C® cable.

RECOMMENDED ACCESSORIES

DELL PREMIER MULTI-DEVICE WIRELESS KEYBOARD AND MOUSE – KM7321W

Multi-task seamlessly across 3 devices with this premium full-sized keyboard and sculpted mouse combo with programmable shortcuts and 36 months battery life.

DELL ULTRASHARP 27" 4K USB-C MONITOR – U2720Q

Experience true color and striking clarity on this 27" 4K monitor with a wide color coverage. This VESA DisplayHDR™ 400 monitor features virtually borderless InfinityEdge and USB-C connectivity with up to 90W power delivery.

DELL DOCKING STATION MOUNTING KIT – MK15

Mount your Dell Commercial Dock behind your compatible monitor or under your desk to create a clutter-free work environment.

This dock is not available in APJ and Brazil.
Power your productivity.

* Dell USB-C and Thunderbolt™ Docks support notebooks that have implemented USB-C or Thunderbolt™ industry specifications.

For USB-C functionality, non-Dell notebooks must support USB Power Delivery 2.0 (or greater) for power delivery of up to 90W, USB 3.2 (or greater) for up to 10Gbps of data transfer and DisplayPort™ Alt mode for video output.

For Thunderbolt™ functionality, non-Dell notebooks must support USB Power Delivery 2.0 (or greater) for power delivery of up to 90W and Thunderbolt™ 3 (or greater) for up to 40Gbps of video and data transfer.

Power button to turn on system, MAC Address Pass-Through, Wake-on Dock and Wake-on LAN features only function on Dell Commercial Windows notebooks. Firmware Update Utility functions with Windows OS systems. Multi-Stream Transport for monitors (Extended Desktops) is not supported on Apple PCs, Dell USB-C Docks will only display in cloned mode. Visit the support page of your non-Dell notebook to determine compatibility.

1. Within Dell Power Manager software, selecting ExpressCharge™ can recharge system battery from 0% up to 80% within 60 minutes. After charging has reached 80% capacity, charging speed will return to normal speed. Recommended for use with the provided Dell power adapter; not recommended with a smaller capacity power adapter. Charging time may vary +/-10% due to system tolerance.

2. Within Dell Power Manager software, selecting either the Default mode of Adaptive Charge or ExpressCharge™ can recharge system battery from 0% up to 35% within 20 minutes when system is powered-off and battery temperature is between 16-45 degrees C. With ExpressCharge™ mode enabled, the system battery can then continue charging up to 80% within 60 minutes. After charging has reached 80% capacity, charging speed will return to normal speed. Recommended for use with the provided Dell power adapter; not recommended with a smaller capacity power adapter. Charging time may vary +/-10% due to system tolerance.

3. When used with Dell systems with Type-C. Based on Dell internal analysis of competitive products using publicly available data as of February 2019.

4. Based on Dell internal analysis, February 2019.

6. Based on Dell internal analysis of competitive products using publicly available data as of February 2019. Power Delivery of up to 130W when used with compatible Dell systems.

7. Based on Dell internal analysis of competitive products using publicly available data as of February 2019. Power Delivery of up to 130W when used with compatible Dell systems. ExpressCharge Boost is available on select Dell systems.

8. Based on Dell internal analysis of competitive products using publicly available data as of February 2019. Power Delivery of up to 210W when used with compatible Dell systems.

9. Functionality downgraded to single USB-C capabilities when only one cable is in use.

10. With TST system - requires one display to be connected through the Thunderbolt port.

11. Up to 4 displays when using Precision 7000 series or a system with DP 1.4 + DSC system.

12. 3rd 4K display will be at 30 Hz.

13. Based on Dell analysis of battery life usage model calculations, Nov. 2020. Results vary depending on use, operating conditions and other factors.

14. HBR (High Bit Rate) is a DisplayPort standard which determines the bandwidth available for displays.

15. DisplayLink Technology works independent of DP and HBR versions.

16. Precision 7100/7520/7530/7720/7730 require more power than 130W, so when docked with the Dell Dock WD19S (150W/180W) or Dell Thunderbolt Dock WD19TBS, the workstation power adapter needs to be plugged in for optimal operation. For the best experience with Precision 7530/7540 or 7730/7740, choose the Dell Performance Dock WD19DCS which comes with a dual USB-C connector that provides up to 210W power delivery, so you no longer need an additional power adapter.

Product availability varies by country. Please contact your Dell representative for more information.
