Dell EcoLoop™ Carrying Cases

INNOVATING FOR A BETTER TOMORROW
As part of our corporate sustainability mission to preserve the planet, Dell’s EcoLoop™ Carrying Cases were designed with the environment in mind. Through creativity and innovative technology, we have developed a unique carrying case collection, which is not only beautiful but helps to keep our planet beautiful for future generations.
Our EcoLoop™ Path

EcoLoop designated items represent our conscious effort to preserve natural resources and reduce our carbon footprint through sustainable practices such as embracing reclaimed materials and improved dyeing processes.

SOLUTION-DYEING

Fabrics are woven from solution-dyed yarns, incorporating color directly into the fibers prior to weaving. The result is a more colorfast, stain-resistant, and cleanable fabric.

RECYCLED WEATHERPROOFING

A weatherproof coating on the fabric made from recycled PVB film recovered from used car windshields.
Making a Positive Impact

Using a weatherproof coating made from a film recovered from automobile windshields to help keep materials out of landfills and replace new material production.

- 90% LESS WATER WASTE
- 62% LESS CO₂ EMISSIONS
- 29% LESS ENERGY USE

*Based on Dell internal analysis of published data on solution-dyed virgin polyester and fabric supplier data sheets, December 2018.
EcoLoop™ Pro Slim
Daily commuters will appreciate how the lightweight, slim profile is ideal for work and beyond.

EcoLoop™ Pro
A classic design and multiple pockets keep professionals organized and on-the-go.
