Made of premium aluminum and a smooth textured metallic finish, the Dell UltraSharp Webcam looks great and makes you look even better. Mounted on your virtually borderless monitor, the webcam sits neatly atop without blocking a single pixel.

**BEST-IN-CLASS IMAGE QUALITY**
Elevate your video conferencing experience with a professional-grade webcam that optimizes your visuals with a large 4K Sony STARVIS™ CMOS sensor, multi-element lens and Advanced Image Signal Processing with AI Auto-Framing.

**ELEGANT AND PREMIUM DESIGN**
Made of premium aluminum and a smooth textured metallic finish, the Dell UltraSharp Webcam looks great and makes you look even better. Mounted on your virtually borderless monitor, the webcam sits neatly atop without blocking a single pixel.

**EASY TO USE**
Offering the world's most seamless webcam mounting solution, the professional grade webcam takes only a fraction of the time to set up. Dell ExpressSign-in automatically detects your presence when you are close and uses Windows Hello to automatically log you in.
Experience sharp and bright professional grade video quality with Dell’s first 4K HDR webcam. It comes with a large 4K Sony STARVIS™ CMOS sensor which captures more light providing crystal clear, vivid and vibrant video clarity wherever you are, offering the best image quality in its class.²

Advanced Image Signal Processing inside the webcam optimizes your visual experience. With Digital Overlap HDR, the webcam guarantees superior picture quality in extreme lighting environments, while video noise reduction automatically eliminates grainy images in low light. AI Auto Framing keeps you at the center of the screen.

Flexibly customize to suit your needs via the Dell Peripheral Manager™ Software. With an easy to use and intuitive user interface, you can effortlessly tweak the brightness, sharpness, contrast and saturation, digitally zoom, auto focus or select your desired field of view with 65°, 78° and 90° options.

Made of premium aluminum and a smooth textured metallic finish, the Dell UltraSharp Webcam is engineered to look unobtrusive and eye-catching. Get an unblocked view on your virtually borderless monitor even when you mount your webcam on it.

You can easily set up your webcam by snapping on the magnetic mount or tripod adapter without tools. Place your webcam on your tripod in front of your monitor and never look like you are reading off the script on your screen and connect with your audience authentically without missing your camera eye-line. A cable management slot on the webcam mount offers a neat and professional setup.

As you approach your webcam, Dell ExpressSign-in wakes your laptop from sleep mode and logs you in using Windows Hello facial recognition. A privacy shutter cap protects your privacy and also your lens when not in use, or magnetically attaches to the back of the webcam’s cylindrical body for safe keeping.

Certified for Microsoft Teams and Zoom and compatible with other leading UC platforms, the UltraSharp Webcam works seamlessly with different applications.
