✓ Supported ✓¹ Supports 1 USB-C connection only ✗ Not supported

See the Dell Commercial Docks Family Brochure for more information on our entire docking portfolio.

* Notebook configurations requiring >90W power may need to be plugged in externally for optimal performance, when used with Dell Dock WD19 / WD19S with 90W power delivery, Dell Universal Dock UD22 or Dell Dual Charge Dock HD22Q. For the best experience with such notebook configurations, choose from Dell Dock WD19/ WD19S (180W), Dell Performance Dock WD19DC / WD19DCS, Dell Thunderbolt Dock WD19TB/WD19TBS or Dell Thunderbolt 4 Dock WD22TB4 based on the notebook's power requirement and compatibility, so you no longer need an additional power adapter.

** These Inspiron notebooks have higher power requirements than the Dell Universal Dock UD22 or Dell Dual Charge Dock HD22Q can deliver. These docks are functionally compatible but if they are used, the notebook's power adapter needs to be plugged in externally for optimal performance.

- 1 These notebooks should be connected to the Dell Performance Dock WD19DC / WD19DCS via a single USB-C connector. The functionality will be reduced to single USB-C, same as the Dell Dock WD19 / WD19S. Connecting both USB-C cables simultaneously may result in unexpected behavior.
- 2 These Precision mobile workstations require more power than 130W, so when docked with the Dell Dock WD19 / WD19S, Dell Thunderbolt Dock WD19TB / WD19TBS or Dell Thunderbolt 4 Dock WD22TB4, the workstations need to be plugged in externally for optimal operation. For the best experience with these Precision series mobile workstations, choose the Dell Performance Dock WD19DC / WD19DCS. The WD19DC / WD19DCS dock comes with a dual USB-C connector that provides up to 210W of power delivery, so you no longer need an additional power adapter.
- 3 Older Thunderbolt systems have partial compatibility with Dell Thunderbolt 4 Dock WD22TB4. Only one of the ports on the Thunderbolt module will function as Thunderbolt, the other will only work as USB/DP.
- 4 Latitude Chromebook Enterprise notebooks are USB-C systems and the recommended dock is the Dell Dock WD19 / WD19S with 90W power delivery. The Dell Thunderbolt Dock WD19TB / WD19TBS, Dell Thunderbolt 4 Dock WD22TB4 and Dell Performance Dock WD19DC / WD19DCS are supported but functionality is reduced to single USB-C, the same as the Dell Dock WD19 / WD19S.
- 5 The dock's power button will not sync with the notebook's power button. The power button sync is not supported on Inspiron/Vostro AMD platforms, but users can still use Power button on the laptop to power on/off the system and all the other functions are supported.
- 6 The dock will function with these Chrome notebooks, but with certain limitations: Dock's power button will not sync with the notebook's power button; No Wake on LAN; No port disablement
- 7 The dock, when used with these Qualcomm Notebooks, can support 2 displays via the docks. A 3rd display can be connected directly to the Notebook

Note: When connected to non-Thunderbolt systems, the Dell Thunderbolt Dock WD19TB / WD19TBS and Dell Thunderbolt 4 Dock WD22TB4 will not retain its Thunderbolt functionality.
