

# CloudIQ

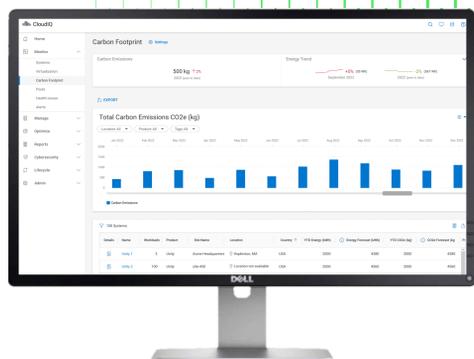

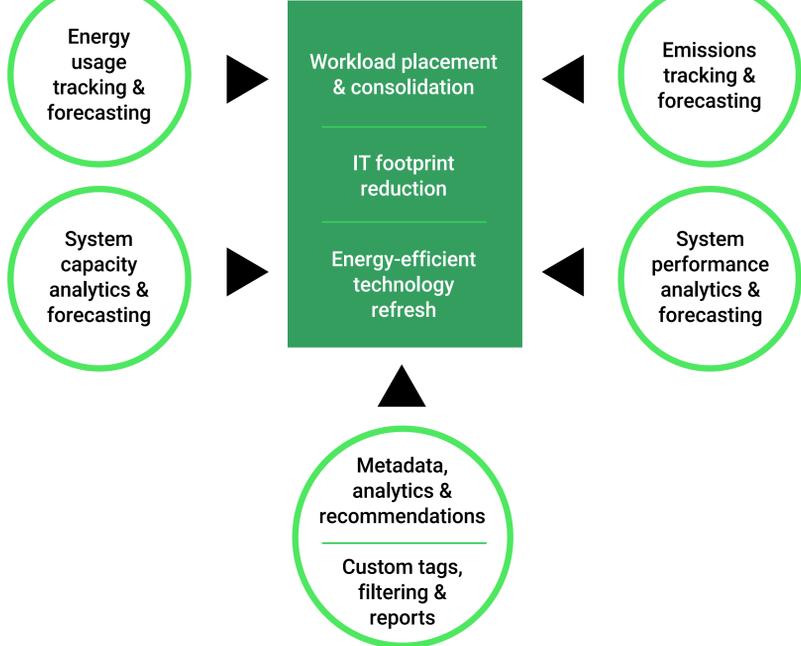

## Accelerate environmental IT initiatives and achieve sustainability goals with CloudIQ – AIOps for Intelligent Infrastructure insights

CloudIQ – AI/ML-based energy and use phase carbon footprint monitoring and forecasting for Dell Technologies server, storage and network infrastructure.

CloudIQ combines IT infrastructure energy and emissions tracking and forecasting with IT infrastructure analytics, so you can make informed decisions about consolidating workloads and refreshing technology for energy efficiency to reduce IT and carbon footprint.

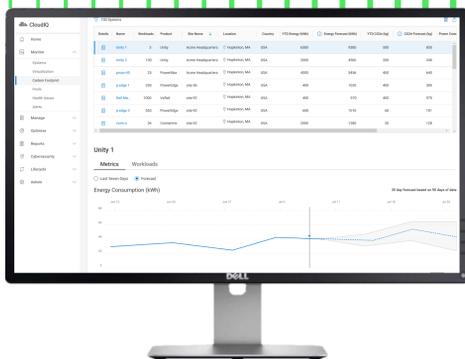

### CloudIQ: Intelligent Insights for Better Sustainability Decisions

#### Reduce Risk of Missing Sustainability Goals

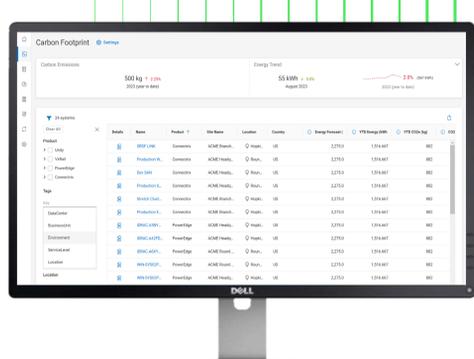

- Track energy usage & use phase carbon footprint at organization, system & workload levels
- Assure accurate calculation with IEA\* CO<sub>2</sub> emission factors & standard PUE\*\* ratio or customize them yourself
- See power usage anomalies

\*International Energy Agency  
\*\*Power Usage Effectiveness

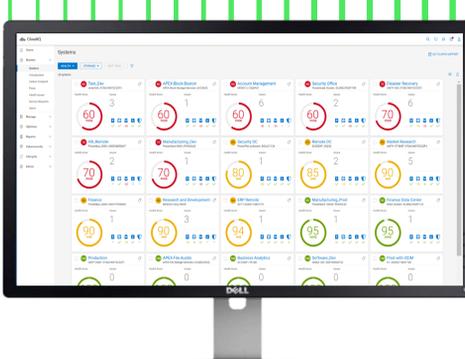

#### Plan Ahead with Sustainability Trends

- Forecast energy usage & use phase carbon footprint at system & workload levels
- See organization level trends & year-to-year comparisons
- Understand server load & storage capacity in context with energy usage

#### Improve Sustainability Productivity

- Eliminate manual tracking & reporting with continuous, automated monitoring & calculation
- Export data to spreadsheets; customize, schedule, export & share reports
- Integrate data with other applications through REST API to improve cross-operations collaboration & automate actions to help you meet your sustainability goals

#### Make Informed Sustainability Decisions

- Combine system sustainability, health, capacity, performance & cybersecurity insights to help you reduce your IT & carbon footprint
- Track system & workload efficiency to know when & where to optimize, consolidate & reclaim workloads and resources
- Track & forecast system emissions to know when & where to refresh with modern, energy-efficient technology

### CloudIQ Validated Value

Resolves issues up to **10X** times faster<sup>1</sup>

Frees IT **1 day/week**<sup>1</sup>

CloudIQ comes with Dell ProSupport and ProSupport Plus Services at no additional cost. For demos, data sheets and white papers visit:
