Advancing Digital Literacy for a Digitally Inclusive Future

We are living in an increasingly mobile and digitally connected world. Technology has changed the way we receive and share information, communicate, and engage with the world around us. As communities increasingly become connected, it is imperative that students, educators, and caregivers have the digital literacy skills needed to successfully participate in our digitally connected global society.

At Dell Technologies, we believe digital literacy should be part of every child's education.

This is why we've partnered with the International Society for Technology in Education (ISTE) to provide resources to develop digital literacy knowledge and skills through the Digital Literacy Skill Building Program.

Digital literacy is defined as the knowledge of, and the ability to use digital technologies to locate information; evaluate information; synthesize, create, and communicate information; and understand the human and technological complexities of a digital media landscape.

Students, Educators and Caregivers: Evaluate Your Digital Literacy Skills

Whether a student, educator, or caregiver, digital literacy skills are essential for thriving in our digital world. Explore GetDigitalSkills.org to discover resources that provide opportunities for self-assessment of digital literacy skills as well as resources to strengthen understanding for all learners.

## Educators: Learn How to Embed Digital Literacy Across Your Curriculum

Educators can dive deeper by completing the **Digital Literacy in the Classroom Course** offered through ISTE U. This a free, 5-hour, on-line course will help educators with their own digital literacy skills while building strategies for implementing digital literacy skills across the curriculum.

Watch a video about this course.

School Leaders: Gather School / District-wide Data

Using a BrightBytes powered survey, districts can collect actionable data from educators, students, and parents in order to set school or district-wide goals and build action plans to advance knowledge and skills across your community. Contact Professional_Learning@dell.com to get started.
