

Dell Connected PC AT&T Promotion

Dell recognizes the need to keep your employees productive and keep data secure in today's world of remote and hybrid work, therefore Dell is partnering with AT&T to make it easier for you to purchase and activate data service on Connected PCs.

How does it work?

Connected PCs are laptops with mobile broadband that work like smartphones to enable access to the internet when a secure Wi-Fi connection is not available.

When you purchase a Connected PC and opt-in, Dell will refer you to AT&T to help you select and activate service.

Dedicated help

Work with a dedicated AT&T team who can find the right data plan options for you and assist with service activation.

Discounted data plans

Receive a discount on data service (up to 3-months free and \$100/new line spread across several months) on eligible plans*.

Seamless activation

Have service activated by AT&T at your convenience to quickly start working via a cellular connection.

AT&T may temporarily slow data speeds if the network is busy. After 25GB, data speeds are up to a max of 3 Mbps.

*Avail. to qual. business customers. Req's purchase of a new laptop from Dell and new line on an eligible AT&T DataConnect Unlimited for Laptop plan. 3 mos. free credits applied over 3 months and start w/in 2 bills. \$100 in bill credits applied equally thereafter over 20 mos.
