Faster time to productivity
- Zero touch fabric deployment
- Protection from human error - predictable and repeatable fabric experience

Automation at scale
- Provides 100% fully automated, zero-touch day 2 operations for VMware ESXi virtual networks

Greater expandability
- Single or multi-rack rack workload clusters in a single site
- Connect non-ESXi devices to the same fabric

Customer benefits

Deployment
1. Enable SmartFabric Services on Dell EMC switches
2. Connect fabric to external network
3. Deploy OpenManage Network integration (OMNI)
4. Onboard ESXi Server Interfaces using OMNI

Management and operation
- Underlay network with EVPN overlay automatically configured without user intervention
- Single Plane Management through VMware vCenter
- Simplified device onboarding and external network connectivity
- Physical network automation synchronized with vCenter VDS port groups changes
- Automated fabric lifecycle management
- Automated switch replacement
- Network visualization

Enjoy operational simplicity with PowerEdge ESXi Servers and vSAN Ready Nodes with SmartFabric Services

Dell Technologies SmartFabric Services for VMware ESXi on PowerEdge

Dynamic Network Provisioning and vCenter Integrated Operations
