Dell Networking for GenAI
Secure and feature-rich fabrics with scalability, redundancy and optimized traffic flows for demanding workloads like GenAI

Connecting fabrics from the edge to the core to the cloud

- High-performance Ethernet switches for modern AI workloads
- Dynamic load balancing, adaptive routing and RoCE congestion control for peak GenAI workload performance
- Simplified management, validated blueprints and better fabric resiliency
- Avoid vendor lock-in and proprietary solutions, with familiar, standards-based Ethernet technologies

Accelerate modern IT workloads with modernized, high-performance fabrics

Embrace innovation, streamline the complex
