High density 1000BASE-T switch

The Dell EMC PowerSwitch S3048-ON 1000BASE-T top-of-rack (ToR) switch is the industry’s first 1GbE enterprise switching platform to deliver both an industry hardened OS and support for open networking, providing freedom to run third-party operating systems (OS).

This open networking platform is built for high-performance, software-defined data centers and provides the features to run traditional workloads and the flexibility to deploy new workloads such as Hadoop, SDS and Big Data. The S3048-ON offers the flexibility to run OS options optimized for diverse deployment needs on a common hardware platform and architecture.

The S3048-ON features a non-blocking switching architecture coupled with OS9.X software, delivering line-rate L2/L3 features for maximized network performance. The S3048-ON design provides (48) 1000BASE-T ports that support 10MbE/100MbE/1GbE and four 10GbE SFP+ uplinks. Each 10GbE interface can be used as uplinks to the network spine/core, as stack ports to connect up to six units in a stacked configuration, or a combination of both, depending on network architecture and uplink/stack bandwidth requirements.

The S3048-ON incorporates multiple architectural features that optimize data center network flexibility, efficiency and availability including:

- I/O panel to PSU airflow or PSU to I/O panel airflow for hot/cold aisle environments
- Redundant, hot-swappable power supplies and fans with color coded touch points for ease of identification/removal
- Dell ReadyRails for efficient installation of the switch into data center cabinets

The S3048-ON also supports Dell Technologies’ Embedded Open Automation Framework, which provides advanced network automation and virtualization capabilities for virtual data center environments. Embedded Open Automation Framework is a suite of network management apps that can be used together or independently to provide a network that is flexible, available and manageable while helping to reduce operational expenses.

Key applications

- High-density 1000BASE-T ToR server aggregation in high-performance data centers environments
- Active Fabric™ designs with the S- or Z-Series core switch to create a two tier, 1/10/40GbE data center network architecture
- Enterprise, Web 2.0 and cloud service providers’ data center networks for ToR applications
- High-performance SDN/OpenFlow 1.3 enabled with ability to inter-operate with industry standard OpenFlow controllers

Key features

- Scalable L2 and L3 Ethernet switching with QoS and a full complement of standards-based IPv4 and IPv6 features, including OSPF, BGP and PBR (Policy Based Routing) support
- Four SFP+ 10GbE ports for maximum flexibility and investment protection
- I/O panel to PSU airflow or PSU to I/O panel airflow
- Redundant, hot-swappable power supplies and fans
- Supports ONIE for zero-touch installation of alternate network operating systems
- Open Networking offers choice of OS, such as Dell EMC Smart-Fabric OS10 and Dell EMC Networking OS9, for inherent stability and feature richness, or the flexibility of a third-party OS
- VRF-lite enables sharing of networking infrastructure and provides L3 traffic isolation across tenants (including support for multicast and IPv6 routing)
- Enhanced automation capabilities (puppet agent, REST API extensions)
- Supports jumbo frames for high-end performance in virtualized environments and IP storage/server communication
- Increase VM Mobility region by stretching L2 VLAN within or across two DCs with unique VLT capabilities like Routed VLT, VLT Proxy Gateway
- User port stacking support for up to six units managed as one logical device
- Embedded Open Automation Framework adds VM awareness automated configuration and provisioning capabilities to simplify the management of virtual network environments

Note: In-field change of airflow direction not supported.

*Ordered separately
**Physical**
- 48 line-rate 100BASE-T ports
- 4 line-rate 10GBase SFP+ ports
- 1 RJ45 console/management port with RS232
- Size: 1 RU, 17.1" x 17.05" x 21.6" d (44.9 x 43.4 w x 32.0 cm d)
- Weight: 22 lbs (9.84 kg) with 2 power supplies
- ISO 7779 A-weighted sound pressure level: <36 dBA
- Max. thermal output: 290 BTU/h
- Power supply: 90–264 VAC 50/60 Hz
- Max. current draw per system: <1A at 100/120V VAC <0.5A at 200/240VAC
- Packet buffer memory: 4MB
- CPU memory: 2GB
- IPv4 routes: 16K
- MAC addresses: up to 80K
- User port stacking up to 6 units
- Link aggregation: 16 links per group, 128 groups per stack
- Queue per port: 8 queues
- Layer 2 VLANs: 4K
- MSTP: 64 instances
- VRF-lite: 64 instances
- Link-rate Layer 2 switching: all protocols, including IPv4 and IPv6
- Forwarding capacity: 131 Mpps
- IPv4 routes: 256
- IPv6 routes: 8K
- IPv4 host table size up to 40K
- IPv6 host table size 8K
- IPv4 Multicast table size 8K
- LAG load balancing: based on Layer 2, IPv4 or IPv6 headers
- Latency 3.7 µsec for 100BASE-T, >1.8 µsec for SFP+
- Packet buffer memory: 4MB
- CPU memory: 2GB

**IEEE compliance**
- 802.1AB LLDP
- 802.1D Bridging, STP
- 802.1P L2 Prioritization
- 802.1Q VLAN Tagging, Double VLAN Tagging, GVRP
- 802.1s MSTP
- 802.1w RSTP
- 802.1X Network Access Control
- 802.3a Gigabit Ethernet (100BASE-T)
- 802.3ac Frame Extensions for VLAN Tagging
- 802.3ad Link Aggregation with LACP
- 802.3ae 10 Gigabit Ethernet (10GBase-X) on optical ports
- 802.3az Energy Efficient Ethernet (EEE)

**RFC and I-D compliance**

**General Internet protocols**
- FTP
- Telnet
- UDP
- TCP
- ICMP
- IPv4
- IPv6
- IPv4 Multicast table size 8K
- IPv6 host table size 8K
- IPv6 Stateless Address Autoconfiguration
- IPv6 Stateless Address Autoconfiguration
- IPv6 Stateless Address Autoconfiguration

**Multicast**

**Network management**
- SNMP
- TACACS, RADIUS, SSH, NTP)
- VRF-Lite (IPv6 VRF with OSPFv3, BGPv6, and IS-IS, and v4 multicast)
- VRRP

**Redundancy**
- Hot swappable redundant power supplies
- Hot swappable redundant fans
- User port stacking up to 6 units

**Performance**
- MAC addresses: up to 80K
- IPv4 routing table size 8K
- IPv6 routes: 8K (shared CAM space with IPv4)
- Switch fabric capacity: 260Gbps (full-duplex)
- 10Gbps (half-duplex)
- Forwarding rate: 131 Mpps
- Link aggregation: 16 links per group, 128 groups per stack
- Queues per port: 8 queues
- Layer 2 VLANs: 4K
- MSTP: 64 instances
- VRF-lite: 64 instances
- Link-rate Layer 2 switching: all protocols, including IPv4 and IPv6
- Forwarding capacity: 131 Mpps
- IPv4 routes: 256
- IPv6 routes: 8K
- IPv4 host table size up to 40K
- IPv6 host table size 8K
- IPv4 Multicast table size 8K
- LAG load balancing: based on Layer 2, IPv4 or IPv6 headers
- Latency 3.7 µsec for 100BASE-T, >1.8 µsec for SFP+
- Packet buffer memory: 4MB
- CPU memory: 2GB

EN 61000-4-3: Radiated Immunity
EN 61000-4-4: EFT
EN 61000-4-5: Surge
EN 61000-4-6: Low Frequency Conducted Immunity

RoHS
All S Series components are EU RoHS compliant.

Certifications
Available with US Trade Agreements Act (TAA) compliance
USGv6 Host and Router Certified on Dell Networking OS 9.7 and greater
IPv6 Ready for both Host and Router
UCR DoD APL (core and distribution ASLAN switch)
Tested to meet or exceed Hi Pot and Ground Continuity testing per UL 60950-1

Warranty
1 year return to depot
