

# Sustainability on Dell EMC Storage

Leading the industry in sustainable practices in our products, packaging and supply chain.

With a broad portfolio of traditional, hybrid and multi-purpose solutions, we can maximize your storage investment while helping you meet your sustainability requirements for your data center.

## Energy Efficiency

# 40%

PowerMax is 40% more energy efficient than the previous generation while delivering the same capacity and maintaining 99.9999% availability.

## Thermals and Cooling

# 95°F

Power-efficient operation up to 95°F/35°C helps reduce cooling costs in temperature-constrained deployments.

## Infrastructure Optimization

# 4:1

guaranteed data reduction with PowerStore, allowing you to reduce your total storage capacity, shrink your data center footprint and save energy.

# A P E X

Take steps toward reducing your carbon footprint with a subscription model that helps you right-size your infrastructure and reduce your e-waste.
