Increasing Productivity by Enabling Advanced Engineering Designs with professional grade tools
Design Engineering, Architecture, and Manufacturing in the Modern Era.

The proliferation of intelligent 3D design is creating competitive advantages for engineering firms of all types by making the integration of complex technology a possibility, including:

- Operational digital twins of real world assets to analyze IoT sensor data in context, and manage more information more intuitively.
- Real-time photorealistic visualization including augmented and virtual reality in order to understand and convey design better for a more satisfied end user.
- Generative design tools that optimize materials and guide early design decisions for the best possible outcomes.
- Reality capture technologies that are leveraging AI to make their complex datasets easier to work with and faster to capture.
Engineering, architecture and manufacturing use cases

Product Design (2D/3D CAD)
Take full advantage of your 2D and 3D CAD software features to efficiently develop models and prototypes.

Simulation and Analysis (CAE)
Drive performance of Computer Aided Engineering (CAE), including finite element analysis (FEA), computational fluid dynamics (CFD), and multibody dynamics (MBD).

Visualization
Efficiently enable visualization tools for creating real-time photo-realistic images and animations, as well as XR tools to view and collaborate on designs in context, by visualizing in real-world scale.

Architectural Design
Meet the demand for increased customization and shorter development cycles, even with large data sets representing the most complex building projects.

Mechanical, Electrical and Plumbing
Proficiently handle mechanical, electrical and plumbing (MEP), as well as HVAC system design and analysis to minimize waste and leverage ecologically-sound designs.

Structural Engineering
Capitalize on applications for analyzing structural components to meet safety and building code regulations.
Engineering, architecture and manufacturing use cases

**Reality Capture**
Capture real world conditions as an input for design, to plan for maintenance, track progress, or preserve its current state.

**Manufacturing Automation**
Listen to your manufacturing floor to make better, real-time decisions - resulting in increased production and higher quality.

**Immersive Technologies**
Expand into immersive technologies such as artificial intelligence and virtual reality to develop smarter designs and simulate your product ideas.

**Collaborators On the Go**
Mobilize your project managers and design collaborators to achieve increased productivity.
Product design - 2D & 3D CAD

**Dell Precision 5860 Tower workstation** provides scalable performance for CAD applications, such as:

- Dassault Systèmes - SolidWorks®, and CATIA®, Autodesk Inventor®, AutoCAD®, PTC, Creo®
- Siemens NX™

Combine with a single or dual Dell UltraSharp monitors and a wireless 3D Connexion Space Mouse to take advantage of the CAD software’s features and to maximize productivity.

Dell Precision workstations provide the interactive performance to increase productivity, which drives faster time to market and more opportunities for iteration, resulting in better product design.

Simulation and analysis (CAE)

Power optimization, generative design and digital twin technology to provide better part design and faster time to market.

The Dell Precision 7960 Tower or 7680 mobile workstations provide scalable performance for CAE applications, such as:

- ANSYS® Mechanical™, Fluent®, DiscoveryTM Live Altair® HyperWorks®, solidThinking® COMSOL Multiphysics®

Combine with a single or dual Dell UltraSharp monitor(s), wireless keyboard and mouse and wireless headset for an exceptional user experience.

Dell Precision workstations provide the extreme performance to enable new paradigms in CAE such as digital twins, multi-physics, optimization and generative design.

Architectural design

Meet competitive demands and delight your clients utilizing design reviews in a rich mixed reality environment.

The Dell Precision 3680 Tower workstation provides space-savings and powers architectural applications, such as:

- Autodesk Revit®, AutoCAD® GRAPHISOFT® ARCHICAD Bentley Software MICROSTATION Robert McNeel & Associates Rhino®

Precision workstations provide the interactive performance to increase productivity, drive faster time to market and open more opportunities for iteration, resulting in better building and site planning, design and more collaborative workflows. With Precision you can also show your work in VR/AR applications.

Dual monitors, wireless keyboard and mouse and wireless headset provide a more comprehensive work space.

Mechanical, electrical and plumbing

Create detailed 3D design for documentation or model for fabrication and construction. Also perform clash coordination including 3D scan data.

The Dell Precision 7875 Tower provides outstanding performance and reliability for MEP and HVAC applications, such as:

- Autodesk® Revit® MEP, AutoCAD® MEP, Navisworks® Trimble® PipeDesigner™, DuctDesigner™

Dell Precision workstations provide the GPU and CPU power to view and analyze complex data sets.

Include 4K monitor(s) and a Wireless 3DConnexion SpaceMouse to enhance the workspace and productivity.

Manufacturing automation

Connect scanners, programmable logic controllers (PLCs) and motors, to integrate relevant data with intelligent upstream applications.

Integrated and automated

Dell Edge IoT products are fanless, designed and engineered to withstand harsh industrial conditions and operate reliably 24x7. Multiple deployment options such as inside control cabinets, on a DIN rail, or outside a cabinet without a mount provide customizable IoT solutions for the manufacturing floor.

Also consider embedding a rack workstation inside manufacturing equipment or as standalone units on the floor because they can withstand extended temperatures and provide outstanding performance.

Make informed decisions based on available data and continuously identify overall volume of products in production and apply set criteria, such as historical performance, to identify ideal products for auditing.
**Immersive productivity**

Take your designs to new levels with artificial intelligence and Xreality.

Dell has “Ready for VR” and AI solutions that are optimized for the intensive graphic and processing power that they require. Our solutions are verified and certified by our Dell Technology Partner Program to ensure reliable performance.

Apply immersive technologies to existing business processes or develop new ones to creative or enhance your competitive advantage and drive the future of design and factory.

Simplify IT

Our most secure and most manageable offerings make IT management a breeze.

SECURITY

Improve fleet-wide security with multiple layers of defense

Reduce the attack surface and enhance long-term cyber resilience with Dell Trusted Workspace

Dell offers the industry’s most secure commercial PCs with protections competitors cannot match:

- Be secure from first boot
  Rigorous, state-of-the-art supply chain controls and Dell-unique Secured Component Verification reduce the risk of product tampering.

- Spot ticking timebombs
  Early-alert feature Indicators of Attack, offered only by Dell, scans for behavior-based threats.

- Stay protected from evolving threats
  Only Dell offers off-host BIOS and firmware verification, providing greater security than other PCs. The latest Intel vPro®-based PCs provide an estimated 70% attack surface reduction. Layer on advanced threat protection with software from our ecosystem of best-of-breed partners.

  Only Dell integrates device telemetry with industry-leading software to improve fleet-wide security.

MANAGEABILITY

Manage your fleet of PCs - reliably and easily

Help secure and optimize your endpoints and deliver end-user productivity with Dell Manageability Solutions

Dell Trusted Update Experience makes it simple to update endpoints, packing the latest BIOS, driver, and firmware version. Dell is the only Top-5 PC vendor that:

- Publishes a device drivers and downloads release schedule:
  IT Admins can deploy fleet-wide device updates on a predictable timeline.

- Performs integrated validation of all driver and BIOS modules in an update:
  IT Admins can expect a trusted, system compatible update deployment, across a fleet of devices.

- Dell has the industry’s first: Binary Large Object (BLOB) package-based solution using Microsoft Intune Systems Management Solution to integrate with Workspace ONE Hardware OEM systems management solution to integrate with Intel vPro®
