

Achieve scalable on-device AI solutions

Dell Services for Dell Pro AI Studio

Simplify the path from on-device AI concept to fleetwide deployment

Organizations looking to deploy on-device AI solutions often face extended development timelines, complicated integration processes, inefficient deployment methods and compatibility issues with various NPUs. Without proven strategies and guidance, realizing the potential of on-device AI can feel out of reach, preventing businesses from achieving their desired outcomes.

Dell Services for Dell Pro AI Studio eliminate the complexities of adopting on-device AI. Through expert guidance, pre-validated models, agile workflows and streamlined deployment processes, we ensure fast implementation and measurable outcomes. Our services enable businesses to optimize AI solutions, scale with agility and rapidly achieve innovation goals.

Leverage Dell expertise to achieve scalable AI success

Maximize your organization's potential with our industry-leading AI expertise. We deliver seamless AI integration, simplified management and expert guidance every step of the way, empowering your business with the tools and knowledge to innovate confidently and drive the outcomes you need.

expert deployment**

**Streamline model
management for
long-term results**

Make on-device AI easy

Dell Pro AI Studio is a free, powerful, all-in-one AI toolkit designed to streamline and accelerate the adoption of on-device AI solutions for businesses. It empowers organizations to create, deploy and manage custom AI applications tailored to their unique workloads—leveraging the advanced capabilities of Neural Processing Units (NPUs) in Dell AI PCs.

This toolkit has no licensing fees and no setup costs, empowering you to effortlessly harness AI potential and deploy it seamlessly across your PC fleet. Learn more about Dell Pro AI Studio [here](#).

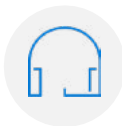

Not ready to dive into Dell Pro AI Studio yourself? Let Dell Services take the lead.

Dell Services for Dell Pro AI Studio

AI Strategy Development	Dell works with you to define use cases, set goals, choose the best model for your needs and develop a plan that aligns with your business objectives.
Deployment and Configuration	We build your solution, including implementation of a validated AI model plus integration with Dell Enterprise Hub, Dell Management Portal and Microsoft Intune — enabling fleetwide deployment and streamlined management.
Solution Optimization	Our experts provide dedicated assistance to fine-tune your on-device AI configurations, ensuring your solution aligns with business needs.
Knowledge Transfer	We prepare your team for independent solution management, with clear guidance on model updates and operations.
Ongoing Advisory	We're here when you need us. Dell can provide additional assistance for management and scalability of your on-device AI solution, ensuring it can evolve with your needs.
