

# Dell EMC Data Migration Services

Accelerate migrations with a consistent, predictable experience regardless of modality or data type

## Move data with confidence

Data is one of your organizations most important resources and you need that data to fuel business growth, but distributed data can keep valuable insights out of reach. Our experts help efficiently move data from where it is, to where it will drive innovation.

We migrate data every day, all over the world, in any situation you can imagine. Whether you are upgrading technology, changing platforms or leveraging cloud, our experts use proven tools to streamline migrations and provide you a faster time to value.

Our Data Migration Services provide greater control, security and value through standardized processes in planning, execution and knowledge transfer. We lower risk through expert-delivered, dependable best practices developed over 30 years of data migration success.

Our goal is to improve data availability and migrate your data efficiently with greater data integrity. Let Dell Technologies help accelerate migrations at every level of your transformation.

## Migrate to APEX Data Storage Services with confidence

Perform block or file migrations from Dell EMC or other brands of storage, from private, hybrid or public cloud.

Migrations can occur at anytime - when aggregating data from multiple sources or moving additional data over time.

**More than simply moving to the next generation of your hardware, Data Migration Services provide a wide spectrum of pathways between modalities.**

**Lower risk** with dependable processes and repeatable options for traditional data, workloads data, application data and data in the cloud.

**Peace of mind** with detailed visibility of the process and milestones with post migration verification.

<b>Traditional Data</b> On-premise physical or virtual migration (HCI, CI, Storage, Server)
<b>Platform</b> Rehost content data on a similar or upgraded platform (SQL, SharePoint, Office365, OneDrive)
<b>To Hybrid Cloud</b> Migrate on-premises data or workloads to hybrid cloud
<b>To Public Cloud</b> Migrate on-premises workloads to public cloud (AWS, Azure, Google)
<b>Repatriate</b> Return workloads or data to on-premise from the public cloud
