Data continues to grow and drive strategic advantage. Meanwhile, national security issues and data privacy regulations are escalating.

As organizations navigate technology changes, they are further challenged with data security and compliance. The end of the product lifecycle is an aspect of data security that is increasingly important.

Whether you are looking to refresh and redeploy assets or retire and remove them to make room for new technology, Dell Technologies Services can provide the assurance that sensitive data will be secured.

Advance IT infrastructure and promote sustainability while maintaining data security

Concern for data security is the #1 reason organizations require help with asset disposition

- The amount of data to be created in the next 5 years
- Is the estimated global cost of cybercrime by 2025
- Of organizations plan to increase investment of asset disposition services in the next 12 months
- Need external help to make sure they cover IT security and risk requirements
Dell EMC Data Sanitization and Data Destruction for Enterprise Services

Secure data on infrastructure systems in the data center—Protect IP, the environment and brand reputation

PROMOTING SUSTAINABILITY

- Accelerate the circular economy, eliminating the concept of waste by focusing on resale or reuse.
- For materials that can’t be reused, we have recycling options that meet or exceed local regulatory guidelines.

KEEPING DATA SECURE

- Navigate an asset refresh or retirement without fear of data compromise
- Data on legacy systems is secured and rendered unrecoverable from unauthorized access

ENABLING COMPLIANCE

- Enable compliance with industry and business standards including US NIST 800-88R1
- NIST compliant certificate provided upon service completion

Data Sanitization for Enterprise

A software-based method of securely overwriting data to render it unrecoverable. Systems must be operational

- **Data Sanitization for Enterprise Onsite**
  For those looking to refresh/redeploy assets, this service performs sanitization at the business’ location, securing data while assets remain in the environment. Available for all Dell EMC infrastructure solutions and similar 3rd party non-Dell branded assets.

- **Data Sanitization for Enterprise Offsite with Asset Resale and Recycle**
  Assets are removed from the business’ environment, sanitized at a secure location and evaluated for resale/reuse. Customer is compensated if value is found, if no value is found, assets are recycled according to local regulatory guidelines. Available for PowerEdge, PowerVault, SC Series (Compellent), PS Series (EqualLogic) and equivalent 3rd party non-Dell branded products.

Data Destruction for Enterprise

A process that renders data inaccessible through the process of physical shredding. Available for all Dell EMC infrastructure solutions and similar 3rd party non-Dell branded assets. Does not require systems to be operational.
