Access to all Dell Learning Communities

Access and network with peers, instructors and Subject matter experts in our dedicated Learning Communities. Engage with our communities to discuss emerging technologies, learn about our training and certifications, share best practices and collaborate with like-minded community members. We have communities of learning on Dell Proven Professional, VxRail Learning, PowerScale Learning, Data Protection Learning, Student Networking forums and more.

Tech Exchange Live

Continue your professional development with our interactive live learning program called Tech Exchange Live, featuring a one-hour session on new emerging technologies and live chat with our experts. Attend our Live session on Cyber Security: Recovery Solutions with more coming each month.

Tech Exchange On Demand

Can't attend Tech Exchange Live session? We also include all the recorded content as part of your subscription.

- VxRail: Deployment Flexibility
- Modern Cloud-Native Applications
- VMware Cloud Foundation on VxRail: Explore the Simplest Path to Hybrid Cloud
- Automation with PowerScale
- Flexible Scalability and Automation with PowerStore
- Automation with VxRail API
- Business Resiliency: What is the role of Cyber Security?
- Automation with Ansible
- More sessions planned on the latest technologies

Instructor Hours

Do you have questions relating to a recent self-paced class you have taken? Instructor Hours offers 90-minute access to our instructors to answer your questions and get the most out of your training. Instructor Hours is limited to enterprise subscriptions. However, individual Instructor Hours may be purchased outside your subscription.

Instructor Hours planned include:

- PowerProtect DD System Administration
- PowerStore Implementation and Administration
- VxRail 7.0.xxx Administration
- Avamar Administration
- Dell EMC PowerEdge Installation Administration and Troubleshooting
- PowerScale Administration - On-Demand

Instructor Sessions

Take a deep-dive into an emerging technology with a four-hour masterclass delivered by Dell Technologies' most senior instructors and subject matter experts. Some topics being planned.

Instructor Sessions planned include:

- Automation on VxRail
- Data Protection Solutions: The Vault
- Automation on PowerStore
- DevSecOps...and more
