

Accelerator Workshops

Ignite innovation with services to unlock advantage, maximize agility and reduce complexity. Workshops available with experts for AI, multicloud, applications & data, and workforce experiences.

THE FIRST STEP: HALF-DAY WORKSHOPS

Identify priorities to build your digital future

The journey begins with a half-day workshop that focuses on your key challenges and helps you identify areas that will benefit from detailed assessments. We combine your goals with our experience working with thousands of other organizations to build a path to your digital future that may include:

- Achieve tangible value and breakthrough transformation with Generative AI (GenAI)
- Delivering business-focused IT services from any cloud
- Modernizing applications and data to gain a competitive advantage
- Driving successful business outcomes with an experience-centric approach to modern work
- Reducing business interruptions, respond to cybersecurity threats and achieve a non-stop digital business.

Our facilitated workshop discussions focus on the activities required to achieve your desired end state and conclude with next steps to further advance your mission and IT strategies.

Available Workshops

- AI
- Multicloud
- Apps & Data
- Modern Workforce
- Security & Resiliency

AI

Optimize, accelerate and innovate with artificial intelligence.

- AI topics can include:**
- Prioritizing GenAI use cases in line with your organization's strategy
 - Identification of potential application integrations to implement GenAI use cases e.g. Digital Human
 - Understanding which pre-trained models are in line with your priority GenAI use cases
 - Discussing the multi-cloud options for GenAI and the benefits of on-premise GenAI platform, in line with Dell's Validated Design
 - Understanding of your GenAI Readiness and how to accelerate your maturity
 - Overview of how to simplify data management and governance to improve data availability for GenAI model customization
 - Identification of data sources to optimize GenAI model customization, including discussion on data preparation options
 - How to simplify data management and governance to improve data availability for GenAI model customization

Multicloud

Deliver mission-critical IT services from any cloud.

- Multicloud topics can include:**
- Building a successful IT service cloud delivery model
 - Reviewing operating model skills, processes, governance and financial needs for service delivery
 - Improving IT-delivered services by understanding what the cloud consumers need to be productive
 - Adopting a multi-ecosystem approach to cloud
 - Supporting microservices development on containers to take advantage of cloud benefits for your applications
 - Embracing infrastructure as code to reduce IT toil
 - Delivering platform as a service
 - Integrating with service catalogues
 - Understanding how to prepare and deliver the right skills to the right people

Apps & Data

Modernize applications and data to gain a competitive advantage.

- Apps & Data topics can include:**
- Modernizing applications to reduce cost, complexity and technical debt
 - Optimizing your application portfolio for maximized value and minimized risk
 - Accelerating cloud adoption for improved availability of essential applications
 - Enabling container adoption to increase innovation and enhance developer experience
 - Embedding security in DevOps processes to reduce security risks
 - Simplifying data management and governance to improve data availability and reduce cost
 - Implementing unified data analytics for enhanced insights and value
 - Reskilling your workforce for cloud native app development

Modern Workforce

Drive successful mission outcomes with an experience-centric approach to modern work.

- Modern Workforce topics can include:**
- Maximizing the value of your Microsoft 365 investment
 - Modernizing teamwork, conferencing, telephony and remote collaboration
 - Improving workspace agility with cloud, virtual desktop and device management
 - Personalizing a self-service experience for client devices and IT services with ServiceNow
 - Simplifying and improving device lifecycle management experiences
 - Embracing security with a proven, Microsoft-centric approach to Zero Trust
 - Driving adoption and consumption with our training portal

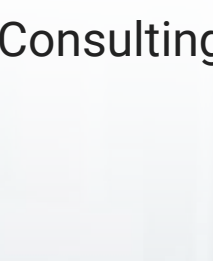

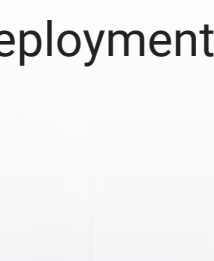

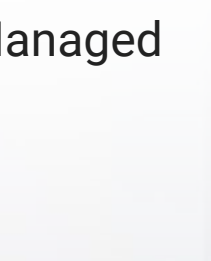

Security & Resiliency

Reduce operational interruptions, respond to cybersecurity threats and achieve a non-stop digital business.

- Security & Resiliency topics can include:**
- Understanding how to build a modern datacenter strategy, optimized for resiliency, innovation, and productivity
 - Learning how to better test operational and disaster recovery efforts, boosting confidence in ability to recover
 - Understanding what it takes to recover business critical functions in the event of a destructive cyberattack
 - Building a plan for proactively detecting and responding to evolving threats
 - Envisioning a data protection strategy aligned with future IT needs

Services for every step of your journey

- Consulting
- Deployment
- Managed
- Support
- Education

Achieve your objectives faster and with less risk through Dell Technologies' comprehensive portfolio of services and global capabilities. We offer targeted engagements leveraging our experience harmonizing business and IT strategies for organizations like yours. Dell Technologies Services helps you quickly realize the agility and cost benefits your business stakeholders expect.

THE DELL TECHNOLOGIES WAY

Harmonize your mission goals and IT strategies

- ✓ **Collaborative**
