Get more out of Dell EMC PowerEdge technology. Starting day one.

Let Dell EMC do the heavy lifting while you focus on business
To get the most out of new technology, you need new servers out of the box and supporting workloads – without risk of unplanned downtime. Trust our experts to lead enterprise deployments ranging from basic hardware installations to complex integrations requiring project planning and advanced configuration. Our complete suite of deployment services and professional certifications help you achieve business outcomes today and tomorrow.

Three great choices that accelerate server adoption

**ProDeploy Plus**
The most complete enterprise deployment offer available prepares you for today and tomorrow
- Features onsite hardware and always onsite software deployment
- 30-days of post-deployment configuration assistance
- Training credits for Dell Technologies Education Services

**ProDeploy**
Maximize your enterprise technology investment from day one
- Features onsite hardware and remote software deployment
- Single point of contact for project management
- Implementation planning

**Basic Deployment**
Consistent enterprise hardware only installation by experienced technicians

Servers deployed by Dell EMC experts have up to

- **43%** fewer technical support calls within the first 90 days versus self-installed systems¹
- **82%** Less planning time²
- **68%** Less time to deploy²

Shift resources to innovation and drive better business results
Great deployment choices for your PowerEdge

Deploying new rack servers, tower servers, modular infrastructure or ready nodes, require dozens of different steps and potentially hundreds of configuration options. Rely on Dell EMC’s experts to help you plan, configure, and verify the deployment so you can focus on your business. ProDeploy and ProDeploy Plus provide the same great service across your choices of OS or Hypervisor without additional costs.

Get the value full value of your new technology through ProDeploy or ProDeploy Plus

ProDeploy and ProDeploy Plus additionally provide the following firmware & software updates

- SAN connectivity
- Driver installs
- BIOS settings
- Virtual Machines
- VMotion/Live Migration
- Datacenter bridging
- Cluster creation
- Network partitioning
- RAID configuration
- Virtual Networking
- Hypervisor manager
- Network Connectivity

Follow your deployment and more in TechDirect

Collaborate with our experts online to plan, track and document your deployment projects with an end-to-end management portal in TechDirect. Save time by centralizing communication across joint teams. Once your new technology is in production, stay with TechDirect to boost productivity with self-service for support and parts dispatch.

Gain proficiency in the skills today’s IT professionals need

Dell Technologies Education Services offers training and certifications in PowerEdge administration and other Server technologies. From self-paced, on-demand courses to virtual, instructor-led options, the Server course tracks provide training and skills validation on the latest techniques for management, configuration, security and troubleshooting.

Drive rapid adoption of your digital technologies

Whether you’re adding new technology, consolidating existing systems or building a data center from the ground up, you can count on Dell EMC for an efficient-deployment culture beginning at the factory. Make sure even the most complex project is effectively planned, configured, integrated and tested right from the start and supported for the future. We’ll look after your deployment projects, so you can look after your business and drive rapid adoption of your digital technologies.
