

Dell EMC Multivendor Support Service

ENABLE **DIGITAL TRANSFORMATION**

WHILE MEETING TODAY'S **SUPPORT NEEDS**

ACROSS YOUR ENTIRE **DATA CENTER**

Simplify data center support, and unlock IT resources for digital transformation

Pressure to maintain quality of service for existing infrastructure, while introducing new technologies, has never been greater. Supporting a mixed-OEM data center introduces additional challenges:

- Complexity and cost of managing multiple support vendors
- Inconsistent service levels and quality across geographies
- Inability to quickly solve issues spanning multiple OEMs
- Risks resulting from engagement with unauthorized third-party maintainers

Multivendor Support addresses these pain points through a holistic and cost-effective solution — all under single contract with the technology leader you know and trust.

Single Point of Accountability

- Consolidate support through Dell Technologies
- Leverage 24x7 tech support with one number to call for all assets
- Seamlessly resolve issues spanning multiple OEMs

Operational Simplicity

- Eliminate direct costs and overhead of managing multiple support vendors
- Reduce unexpected out-of-warranty repair expenses
- Unlock and redirect IT resources to digital transformation

Global Consistency

- Simplify operations with consistent support that meets requirements globally
- Exceed service and quality expectations while meeting budget demand
- Extend the life of IT assets without impacting service levels

A majority of IT decision makers agree: internal IT staff spends too much time on support and maintenance issues which prevents them from focusing on innovation.

— A commissioned study conducted by Forrester Consulting on behalf of Dell Technologies Services, December 2020

Key Offer Components
