Even the most experienced IT organizations can require deeper expertise and advice keeping their environment maintained and running at optimal performance.

A Dell EMC Technical Account Manager (TAM) is an experienced high-level technical expert, focused on a specific technology area within your Dell Technologies infrastructure solutions environment.

The TAM for Infrastructure Guidance combines technical problem-solving skills and business acumen to help streamline day-to-day performance and offer proactive recommendations for optimal and overall health. They are experts on your Dell Technologies infrastructure focused on your strategic business goals and future success.

Also available is a TAM for Designated Remote Support which are product-specific troubleshooting experts that you have direct access to when there is an issue. They use their expert technical understanding and in depth knowledge of your unique architecture and specific solution to expedite resolution. They leverage additional senior-level technical resources and have direct access to product engineering to ensure rapid problem resolution and maximum uptime.

**TAM for Infrastructure Guidance:**
- Regularly scheduled weekly, monthly, and quarterly technical reporting and reviews.
- Proactive environment optimization including code and configuration recommendations to maintain peak performance.
- Technical knowledge transfer sessions plus best practice advice and recommendations to help keep your staff educated and up to date.

A TAM for Infrastructure Guidance will help you stay ahead of issues, your technology at optimal performance and your staff educated on current and future looking technical best practices.

**TAM for Designated Remote Support:**
- When issues occur, your TAM for Designated Remote Support will troubleshoot, diagnose, reproduce, manage and resolve your service request.
- Direct access to Dell Technologies engineering, to ensure the fastest possible resolution of product issues.

When an issue occurs, a TAM for Designated Remote Support is there to handle it from initial notification until resolution.

**Key Benefits**
- Identification of problem areas before they can impact your business
- Valued resource that combines technical expertise and account management skills
- Personalized support experience with a designated, product-focused troubleshooting expert with in-depth knowledge of your environment
- Improved productivity through real-time communication and reporting enabling your organization to make informed decisions and continuous improvements
