SaaS platform for data protection and cyber resilience

INFOGRAPHIC

BACKUP SERVICES

With the increase of critical data being stored remotely, it's important to have an endpoint backup plan.

Centralized, secure protection of your remote business data

DELL APEX BACKUP SERVICES FOR ENDPOINTS

- Long-term Retention
- Reporting
- Storage Insights

Protect your on-prem and cloud-based workloads directly to the cloud

DELL APEX BACKUP SERVICES FOR HYBRID WORKLOADS

Dell APEX Backup Services delivers radically simple data protection as-a-Service enabling your business to simplify your day-to-day by eliminating infrastructure management and ensuring all-in-one secure protection with backup, disaster recovery, and cyber resilience.

Simple User Experience

Dell APEX Backup Services delivers the resiliency and speed you need to meet business SLAs with a low TCO.

You choose the workload you want to protect—SaaS applications, endpoints, or hybrid.

Protecting data integrity is an industry-wide challenge

69% report a lack of data protection solutions for newer technologies such as containers, cloud-native apps and IoT

181% agree that their organization has increased exposure to data loss from cyber threats with the growth of employees working from home
