Microsoft Azure Arc-enabled data services

Azure Arc-enabled data services provides a version of SQL that can now be deployed on the validated infrastructure of Dell Technologies. Always up-to-date with the current version of SQL there are no more migrations, no more upgrades, and no more end of support — it is simply always current.

Data Storage Services

An as-a-service portfolio of scalable, elastic storage resources built on our industry-leading technologies

The best of both worlds

Azure Arc-enabled data services and Dell Technologies APEX Data Storage Services both provide elastic scalability. Instances of SQL Server can be ramped up or down to meet the requirements of your workloads. APEX Data Storage Services allows seamless scaling of capacity up and down and simple pricing with a single rate for base capacity and on-demand usage, so there is no penalty for the flexibility of on-demand, elastic usage.

Time-to-value in as few as 14 days

Designed for 99.9999% availability

#1 enterprise storage provider

Capacity deployed or removed as usage fluctuates
Pay for what you use above base capacity
Min. capacity commitment determines $/GB rate
