The power of Dell-managed interconnected colocation

Dell APEX Storage Services at Equinix data centers enhance the value of your as-a-Service resources with software-defined interconnectivity, enabling access to an ecosystem of partners, service providers, and public cloud services without sacrificing performance, security or control.

Benefits of Dell-managed interconnected colocation:
- 10x speed to market when using Equinix digital services when compared to physical deployments
- 142% ROI with an NPV of $15.6 million
- 60% decrease in holistic costs for internal infrastructure

Equinix data centers are strategically located globally with immediate proximity to digital ecosystems.

Beneﬁts of Dell-managed interconnected colocation:
- 10x speed to market when using Equinix digital services when compared to physical deployments
- 142% ROI with an NPV of $15.6 million
- 60% decrease in holistic costs for internal infrastructure

GAME-CHANGING PARTNERSHIP

No. 1 global leader in enterprise storage

A leader in worldwide Data Center Colocation and Interconnection Services

A global ecosystem of over 10,000 customers

Over 2,000 Network service providers

Global access to low latency, multicloud connectivity

Simplify operations and relieve the burden of data center management

Easy ordering in a matter of clicks – just choose your location in the Dell APEX Console

Single point of contact and a single invoice from Dell Technologies

Remove complexity to deliver more value to your organization with solutions that are:

SIMPLICITY

FRICTIONLESS

Agility

EXPANDABLE

RESPONSIVE

CONTROL

DEPENDABLE

VERSATILE

SECURE

Manage unpredictability by responding dynamically to changing business needs, with solutions that are:

AGILITY

EXPANDABLE

RESPONSIVE

CONTROL

Reduce risk with flexible, reliable, multicloud-ready storage services:

DEPENDABLE
